## BIOCHEMISTRY

| Parameters  | Observed Values | Units | Reference Range  | Sample |
|---|-----------------|-------|--|--------|
| GLYCATED HEMOGLOBIN (HBA1C (Sample Received On:9 Nov, 2024 8:57:0 | ),<br>0 AM)     |       |  |        |
| GLYCATED HEMOGLOBIN[HPLC]   | 6.5             | %     | "Non-Diabetic HbA1c < 5.6 Fasting plasma glucose <100 Pre - Diabetes HbA1c 5.7 - 6.4 Fasting plasma glucose 100 - 125 Diabetes HbA1c > 6.5 Fasting plasma glucose > 126" |        |
| ESTIMATED AVERAGE GLUCOSE   | 140             | mg/dL |  |        |

Note: Any condition altering red cell life will alter the GHB values. Low Hb% values may not correlate with GHB. GHB value should not be taken as a sole criteria for diagnosis. GHB gives average Blood Glucose level for the period of 10 - 12 wks & it need not correlate with blood sugar levels. For Geriatric group, HbA1c reference range depends upon comorbid conditions.

DISCLAIMER: The result obtained relate only to the sample given/received & tested. A single test result is not always indicative of a disease, it has to be correlated with clinical data for interpretation.

#### **USG ABDOMEN AND PELVIS**

LIVER: Enlarged in size (15.8cms) and shows moderate increase in echopattern. No focal lesions seen. Intrahepatic biliary radicals are normal. Portal vein appears normal.

GALL BLADDER: Distended, appears normal. No obvious calculi / pericholecystic fluid seen. Common bile duct is not dilated.

PANCREAS: Normal in size, shape & has uniform echogenicity.

SPLEEN: Normal in size (11.5cms) and echopattern. No focal lesions seen.

KIDNEYS: Both the kidneys are normal in position, size, shape and contour.

Cortical echogenicity is normal, corticomedullary differentiation is well maintained.

RT.KIDNEY- 11.4cm in length and 1.6cm in parenchymal thickness. No calculi / hydronephrosis seen.

LT.KIDNEY- 11.5cm in length and 1.7cm in parenchymal thickness. No calculi / hydronephrosis seen.

**URINARY BLADDER:** Normal in outline and wall thickness. No calculi or mucosal irregularity seen.

PROSTATE: Normal in size and echotexture.

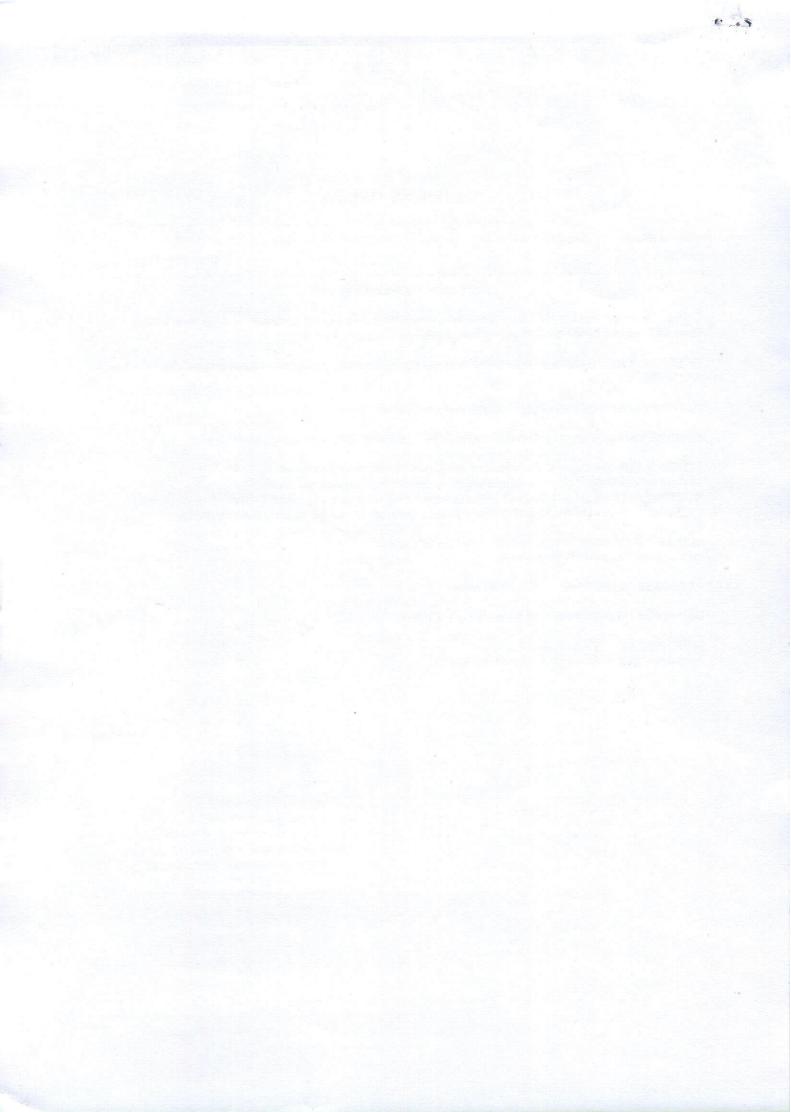

No free fluid / dilated / thickened bowel loops are noted.

#### IMPRESSION:

-Hepatomegaly with grade II hepatic steatosis.
