## HbA1C

Test name	results	units
HbA1c{GLYCOSYLATED HEMOGLOBIN}BLOOD	5.58	%

### Interpretation

As per American Diabetes association {ADA}	
Reference Group	HbA1c in %
Non diabetic adults >=18 years	4.0 - 6.0
At risk	> = 6.0 to <= 6.5
Diagnosing diabetes	>6.5
Therapeutic goals for glycemic Control	Adults Goal of therapy : < 7.0 Action suggested : >8.0

**Note :** 1. Since HbA1c reflects long term fluctuations in the blood glucose concentration, a diabetic patient who is recently under good control may still have a high concentration of HbA1c. Converse is true for a diabetic previously under good control but now poorly controlled.

2. target goals of < 7.0 % may be beneficial in patients with short duration of diabetes , long life expectancy and no significant cardiovascular disease .In patient with significant complications of diabetes , limited life expectancy or extensive co-morbid conditions, targeting a goal of < 7.0 % may not be appropriate.

### Comments

HbA1c provides an index of average blood glucose level over the past 8-12 weeks & is a much better indicator of long term glycemic as compared to blood & urinary glucose determinations.

### ADA criteria for correlation between HbA1c & Mean plasma glucose levels

HbA1c %	Mean plasma glucose {mg/dl }	HbA1c %	Mean plasma glucose {mg/dl }
5	98	9	212
6	126	10	240
7	154	11	269
8	183	12	298

### Recommendation:-

1. This report is not valid for medico legal purposes.
2. The test can be repeated free of cost in case of any discrepancy.
3. Test to be clinically correlated.
4. All card tests require confirmation by serology
5. False negative or false positive results may occur in some cases

Age/Sex : 41Yrs/M

## ULTRASONOGRAPHY OF ABDOMEN

**LIVER :** Liver is normal in size & shape. Hepatic biliary radicals are normally outlined. Portal vein is normal in caliber. No evidence of liver abscess. Movements of diaphragm are not restricted. No evidence of secondaries. CBD is of normal calibre.

**GALL BLADDER :** Gall Bladder is distended. Walls are normal. Lumen shows normal echo.

**PANCREAS :** Pancreas is normal in size, shape and echotexture. No evidence of any collection in lesser sac.

**SPLEEN :** Spleen is normal in size, shape and echotexture. Calibre splenic vein at hilum is WNL.

**RIGHT KIDNEY :** Right kidney is normal in size & shape. Cortical thickness is WNL. Pelvi-calyceal system is normal. There is no evidence of a calculus. No backpressure changes or S.O.L. Corticomedullary differentiation is well maintained.

**LEFT KIDNEY :** Left kidney is normal in size & shape. Cortical thickness is WNL. Pelvi-calyceal system is normal. There is no evidence of a calculus. No backpressure changes or S.O.L. Corticomedullary differentiation is well maintained.

**URETERS:** Both ureter are normal and not dilated

**URINARY BLADDER :** UB is seen filled stage. lumen is echo free walls are normal.

**PROSTATE :** Prostate is normal in size. No focal lesion seen.

**IMPRESSION:-** NORMAL U.S.G.
