**X RAY CHEST PA**

Both lung fields show prominent broncho-vascular markings.

No evidence of any active infiltrations or consolidation.

Cardiac size appears within normal limits.

Both costo-phrenic angles appear free of fluid.

Both domes of diaphragm appear normal.

Radiological interpretation is professional opinion and not the final diagnosis. Please see your referring doctor for interpretation of these results. Not valid for medico legal purposes. Results are subject to variations due to technical limitations and patient's preparation, hence correlation with clinical findings and other investigation should be carried out to know the nature of illness.
