eAG (Estimated Average Glucose)	108.28	mg/dL	
eAG (Estimated Average Glucose)	6.01	mmol/L	

Method : Fluorescence Immunoassay Technology

Sample Type : EDTA Blood

Test Performed by:-

Fully Automated (EM 200 ) ERBA MANNHEIM.

#### Remarks :

Glycosylated Hemoglobin Testing is Recommended for both (a) Checking Blood Sugar Control in People who might be Pre-Diabetic. (b) Monitoring Blood Sugar Control in patients in more elevated levels, termed Diabetes Mellitus. The American Diabetic Association suggests that the Glycosylated Hemoglobin Test be Performed atleast Two Times in Year in Patients with Diabetes that are meeting Treatment Goals (and That have stable glycemc Control) and Quarterly in Patients with Diabetes whos therapy has changed or that are not meeting Glycemc Goals.

Glycosylated Hemoglobin measurement is not appropriate where there has been change in diet or Treatment within 6 Weeks. Hence people with recent Blood Loss, Hemolytic Aneamia, or Genetic Differences in the Hemoglobin Molecule (Hemoglobinopathy) such as Sickle-cell Disease and other Conditions, as well as those that have donated Blood recently, are not suitable for this Test.

## THYROID HORMONES T3,T4,TSH (THYROID PROFILE)

Test Name	Observed Values	Units	Reference Intervals
T3 (Total Triiodothyronine)	0.99	ng/ML	0.6 - 1.8 ng/ML
T4 (Total Thyroxine)	8.32	µg/dL	4.60-12.50 µg/dL
TSH (Thyroid Stimulating Hormone)	1.39	µIU/mL	0.35--5.50

Sample Type : Serum

Test Performed by:-

Fully Automated Chemi Luminescent Immuno Assay (ARCHITECT- i1000 PLUS ) Abbott USA

Remarks :

Primary malfunction of the Thyroid gland may result in excessive (hyper) or Low (hypo) release of T3 or T4. In addition, as TSH directly affect thyroid function, malfunction of the pituitary or the hypothalamus influences the thyroid gland activity.

Disease in any portion of the thyroid-pituitary-hypothalamus system may influence the level of T3 and T4 in the blood, in Primary Hypothyroidism, TSH levels are significantly elevated, while in secondary and tertiary hypothyroidism, TSH levels may be low. In addition, in Euthyroid sick syndrome, multiple alterations in serum thyroid function test findings have been recognized.
