**TEST REPORT** 

: 40300710929 Reg. Date : 09-Mar-2024 10:32 Ref.No : Reg. No. : 09-Mar-2024 12:06 **Approved On** 

Name : KARISHMA MUKESH AHIRE

Age : 27 Years Gender: Female Dispatch At Pass. No.:

Ref. By Tele No.

Location : SPECTRA DIAGNOSTIC @ LP SAVANI ROAD

Test Name	Results	Units	Bio. Ref. Interval	
	THYROID FUNC	CTION TEST		
T3 (triiodothyronine), Total	1.25	ng/mL	0.6 - 1.81	
T4 (Thyroxine),Total Method:CLIA	10.0	μg/dL	4.5 - 12.6	
TSH (Ultra Sensitive)  Method:CLIA	H <b>9.542</b>	μIU/mL	0.55 - 4.78	
Sample Type:Serum				

Sample Type:Serum

Thyroid stimulating hormone (TSH) is synthesized and secreted by the anterior pituitary in response to a negative feedback mechanism involving concentrations of FT3 (free T3) and FT4 (free T4). Additionally, the hypothalamic tripeptide, thyrotropin-relasing hormone (TRH), directly stimulates TSH production. TSH stimulates thyroid cell production and hypertrophy, also stimulate the thyroid gland to synthesize and secrete T3 and T4. Quantification of TSH is significant to differentiate primary (thyroid) from secondary (pituitary) and tertiary (hypothalamus) hypothyroidism. In primary hypothyroidism, TSH levels are significantly elevated, while in secondary and tertiary hypothyroidism, TSH levels are low.

#### **TSH levels During Pregnancy:**

First Trimester : 0.1 to 2.5  $\mu IU/mL$ Second Trimester: 0.2 to 3.0 µIU/mL Third trimester: 0.3 to 3.0 µIU/mL

## **HEMOGLOBIN A1c TEST**

Test	Observed Value	Unit	Biological Reference Interval
HbA1c	5.58	%	> 8 : Action Suggested 7-8 : Good control < 7 : Goal 6.2-7 : Near Normal Glycemia < 6.2 : Non-diabetic Level

Mean Blood Glucose 113.4 mg/dL 80.0 - 140.0

Importance of HbA1c - Glycated Hb. in Diabetes Mellitus

- HbA1c, also known as Glycated Hemoglobin is the most important test for the assessment of long term blood glucose control (also called glycemic control)
- HbA1c reflects mean blood glucose concentration over past 6-8 weeks and provides amuch better indication of long term glycemic control than blood glucose determination
- HbA1c is formed by non-enzymatic reaction between glucose and Hb., this reaction is irreversible and therefore remains unaffected by short term fluctuations in blood glucose levels.
- Long term complications of diabetes such as retinopathy-eye complications, nephropathy-kidney complications and neuropathy-nerve complications, are potentially serious and can lead to blindness, kidney failure etc.
- Glycemic control monitored by HbA1c measurement using HPLC method-(Gold Standard) is considered most important. (Ref. National Glycohemoglobin Standardization Program NGSP).
