MEDIWHEEL-FULL BODY CHK-ABOVE40-FEMALE

Namaste Ms. SUNITA SINHA,

Thank you for choosing Apollo ProHealth, India's first AI-powered health management program, curated to help you make positive health shifts. Being healthy is about making smart choices, and you have taken the first step with this program. We are privileged to be your healthcare partner. Your health is our priority.

We are with you on your path to wellness by:

Predicting your risk: Artificial Intelligence-powered predictive risk scores are generated, based on your personal, medical, and family history and detailed multi-organ evaluation of your body through diagnostic and imaging tests.

Preventing onset or progress of chronic lifestyle diseases: Your Health Mentor is available to help you understand your physician's recommendations and helping you handle any concerns (complimentary service up to one year)

Overcoming barriers to your wellbeing: Your Health Mentor will help you set your health goals and guide you with tips to stay on track. We will also, digitally remind you to proactively prioritize your health.

Through this report, you will be able to understand your overall health status, your health goals and the recommendations for your path to wellness. Your Health Report will include the following:

- Your medical history and physical examination reports
- Results from your diagnostic and imaging tests
- AI powered health risk scores
- Your physician's impression and recommendations regarding your overall health
- Your personalized path to wellness, including your follow-up assessments and vaccinations

MAMMOGRAPHY BOTH BREAST

FINDINGS :

Breast composition :-

C. Heterogenously dense parenchyma obscuring optimum mammography evaluation in central quadrant.

Both breasts show normal architecture of parenchyma, with glandular and fibrofatty elements.

No evidence of obvious focal lesion seen.

No evidence of any pleomorphic microcalcification.

No evidence of skin thickening or nipple retraction seen.

Retromammary area is normal.

Axillary tail region appear normal.

No evidence of axillary lymphadenopathy.

IMPRESSION :

No significant abnormality.

(BIRADS-I)

In dense breast correlation with USG or previous study suggested.
