### Clinical Information:

Primary malfunction of the thyroid gland may result in excessive(hyper)or low (hypo) release of T3 or T4 . In addition, as TSH directly affect thyroid function, malfunction of the pituitary or the hypothalamus influences the thyroid gland activity . Disease in any portion of the thyroid-pituitary-hypothalamus system may influence the level of T3 or T4 in the blood, in Primary hypothyroidism , TSH levels are significantly elevated, while in secondary and tertiary Hypothyroidism , TSH levels may be low. In addition, In Euthyroid sick Syndrome, Multiple alterations in serum thyroid function test findings have been recognized.
