**DEPARTMENT OF CLINICAL BIOCHEMISTRY I**  
**Thyroid Profile (T3,T4,TSH), Serum**

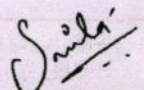

Investigation	Observed Value	Biological Reference Interval
Triiodothyronine Total (T3) Method:CLIA	1.03	0.70-2.04 ng/mL Pregnancy: 1st Trimester: 0.81 - 1.90 ng/mL 2nd & 3rd Trimester: 1.00 - 2.60 ng/mL 5.5-11.0 µg/dL
Thyroxine Total (T4) Method:CLIA	10.4	
Ultra Sensitive Thyroid Stimulating Hormone (U.TSH) Method:CLIA	2.05	0.4 - 4.5 µU/mL Pregnancy: 1st Trimester: 0.3 - 4.5 µU/mL 2nd Trimester: 0.5 - 4.6 µU/mL 3rd Trimester: 0.8 - 5.2 µU/mL

**Interpretation:** A thyroid profile is used to evaluate thyroid function and/or help diagnose hypothyroidism and hyperthyroidism due to various thyroid disorders. T4 and T3 are hormones produced by the thyroid gland. They help control the rate at which the body uses energy, and are regulated by a feedback system. TSH from the pituitary gland stimulates the production and release of T4 (primarily) and T3 by the thyroid. Most of the T4 and T3 circulate in the blood bound to protein. A small percentage is free (not bound) and is the biologically active form of the hormones.

**Glycosylated Hemoglobin (HbA1C), EDTA Whole Blood**

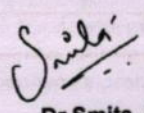

Investigation	Observed Value	Biological Reference Interval
Glycosylated Hemoglobin (HbA1c) Method:High-Performance Liquid Chromatography	5.3	Non-diabetic: <= 5.6 % Pre-diabetic: 5.7 - 6.4 % Diabetic: >= 6.5 %
Estimated Average Glucose (eAG) Method:Calculated	105	mg/dL

**Interpretation:** It is an index of long-term blood glucose concentrations and a measure of the risk for developing microvascular complications in patients with diabetes. Absolute risks of retinopathy and nephropathy are directly proportional to the mean HbA1c concentration. In persons without diabetes, HbA1c is directly related to risk of cardiovascular disease.

In known diabetic patients, HbA1c can be considered as a tool for monitoring the glycemic control.  
 Excellent Control - 6 to 7 %,  
 Fair to Good Control - 7 to 8 %,  
 Unsatisfactory Control - 8 to 10 %  
 and Poor Control - More than 10 %.
