Address	: DCLBERGA, HOWRAH, HOWRAH, West Bengal, 711008	Facility	: NARAYAN MEMORIAL HOSPITAL

LDL CHOLESTEROL Normal - Supernormal Category	111	mg/dl	Normal < 100 Borderline 100-129 High > 130
VLDL Normal - Elevated	25	mg/dl	0-35
CHOLESTEROL-HDL RATIO	4.18	-	-
LDL-HDL RATIO	2.58	-	-
TRIGLYCERIDES Normal - Supernormal Category	125	mg/dl	< 100
URIC ACID SAMPLE : SERUM			
URIC ACID Normal - Supernormal Category	3.7	mg/dl	2.4-5.7
BUN / CREATINE RATIO SAMPLE : SERUM			
BUN / CREATINE RATIO	15.7		
GLYCOSYLATED HAEMOGLOBIN (HbA1C) SAMPLE : EDTA BLOOD			
HbA1C	5.7		

Interpretation & Remark:

- HbA1c is used for monitoring diabetic control. It reflects the estimated average glucose.
- HbA1c has been endorsed by clinical groups & American Diabetes Association guidelines 2017, for diagnosis of diabetes using a cut-off point of 6.5%.
- Trends in HbA1c are a better indicator of diabetic control than a solitary test.
- Low HbA1c in a non-diabetic individual are often associated with systemic inflammatory diseases, chronic anaemia (Specially severe iron deficiency anaemia & haemolytic), chronic renal failure and liver diseases. Clinical correlation suggested.
- Interference of hemoglobinopathies in HbA1c estimation.
 - A. For HbF > 25%, an alternate platform (Fructosamine) is recommended for testing of HbA1c.
 - B. Heterozygous hemoglobinopathy is detected, fructosamine is recommended for monitoring diabetic status.
 - C. Heterozygous state detected (D10 turbo is corrected for HbS and HbC test).
- For known diabetic patients, following values can be considered as a tool for monitoring the glycaemic control:

Excellent Control - 6-7 %
 Fair to Good Control - 7-9 %
 Unsatisfactory Control - 9-10 %
 Poor Control - > 10 %

Note: Hemoglobin electrophoresis (HPLC method) is recommended for detecting hemoglobinopathy.

PAP Smear

TEST NAME	RESULTS	UNIT	REFERENCE RANGE
TEST NAME	RESULTS	UNIT	REFERENCE RANGE

OBSERVATION

CY-29/24

CYTOLOGY / PAP SMEAR REPORT

Bethesda Classification 2014

SPECIMEN – Cervicovaginal smear.

GROSS – Two smears received. Stained with PAP stain.

Adequacy of Specimen – Adequate.

General Classification – Benign.

Cell Type –

• Mixture of superficial and intermediate squamous cells seen.

Endocervical cells – Occasional.

Metaplastic Cells – Absent.

No intraepithelial lesion or malignant cell seen.

Degenerative changes – Absent.

T.Vaginalis/ Candida/other organism- Absent

Neutrophils – Plenty.

Bacteria – Absent.

IMPRESSION :

• Negative for intraepithelial lesion or malignancy.

• Inflammatory Smear.

Remarks : It is a screening test. Negative report do not excluded presence of neoplasia.

Ref. Doctor	Dr. Reddy	DOB	1978-05-15
Address	123456789, Narayan Memorial Hospital, 123456789	Facility	Narayan Memorial Hospital

Immunology

TEST NAME: TITRATION TEST
 REFERENCE RANGE: 1:16 - 1:256

Parameter	Result	Unit	Reference Range
Ti	1:40	right	1:16 - 1:64
Anti-HBs	1:80	right	1:16 - 1:256
Ti	1:20	right	Anti-HBs - 1:16 - 1:256
Anti-HBs			1:16 - 1:256
Ti			1:16 - 1:256
Anti-HBs			1:16 - 1:256

- Interpretation:**
- For diagnostic purposes, the result should always be assessed in conjunction with the patient's medical history, other investigations and other findings.
 - The assay is unaffected by serum (albumin = 300 µmol/L or = 42 mg/dL), haemoglobin (Hb = 0.250 mmol/L or = 1.4 g/L), serum lipoprotein = 200 mg/dL, bilirubin (= 2.00 mmol/L or = 25 mg/dL), IgG = 2 g/dL and IgM = 0.5 g/dL.
 - There is no high dose hook effect at Ti concentrations up to 1:256 µmol/L.
 - Ti values may be transiently altered because of non-specific drugs for several infections, liver disease, renal and heart failure, several burns, trauma and surgery etc. Drugs that decrease Ti values e.g. L-thyroxine, chloroquine that increase Ti values e.g. iodine, lithium, benzodiazepine.
 - The assay is unaffected by serum (albumin = 300 µmol/L or = 42 mg/dL), haemoglobin (Hb = 0.250 mmol/L or = 1.4 g/dL), serum lipoprotein = 200 mg/dL and bilirubin (= 2.00 mmol/L or = 25 mg/dL).
 - The assay is unaffected by serum (albumin = 300 µmol/L or = 42 mg/dL), haemoglobin (Hb = 0.250 mmol/L or = 1.4 g/dL), serum lipoprotein = 200 mg/dL and bilirubin (= 2.00 mmol/L or = 25 mg/dL).

USG REPORT OF BREAST (SCREENING)

Both breasts were scanned quadrants wise using a high frequency probe.

Both breasts revealed normal parenchymal echotexture.

No obvious focal mass lesion seen.

No microcalcifications are seen.

Bilateral retroaxillary regions appear normal.

No significant enlarged lymph nodes seen in either axillary region.

IMPRESSION :- No obvious abnormality seen in either breast.

Please correlate clinically.

Address	JADURBERIA, HOWRAH, HOWRAH, West Bengal, 711118		

USG REPORT OF WHOLE ABDOMEN (SCREENING)

LIVER : Liver is normal in size. Parenchymal echogenicity is raised. Intrahepatic biliary radicles are not dilated. No focal mass lesion is seen.

PORTA :PV : Normal.

CD : Normal.

GALL BLADDER : Gall bladder is normal in size, contour, outline and position. No calculus is seen. Wall thickness is normal.

PANCREAS : Pancreas is normal in size and parenchymal echogenicity. Pancreatic duct is not dilated.

SPLEEN : Spleen is not enlarged and parenchyma shows normal homogeneous pattern.

KIDNEYS : Both kidneys are normal in size, shape, outline, position and parenchymal echogenicity. Cortico medullary differentiation maintained.

No evidence of any calculus/ mass / hydronephrosis is seen.

Right kidney measures : 9.9 cm & Left kidney measures : 9.6 cm.

URINARY BLADDER : Urinary bladder is normal in contour, outline and distension. No vesical lesion is seen.

UTERUS : Anteverted normal in size, shape, outline, position and parenchymal echogenicity. Endometrium thickness measures 1.0 cm. Cavity is empty.

Uterus measures 7.6 cm x 4.9 cm x 4.2 cm.

REPORT OF ECHO SCREENING

No regional wall motion abnormality at rest.
Normal LV systolic function (LVEF = 65%).
Normal RV systolic function. (TAPSE = 1.6 cm).
Grade I LV diastolic dysfunction.
No pericardial effusion.
Mild TR. Estimated PASP 20 mmHg.
IVC normal diameter & > 50 % respiratory compressibility.
No thrombus, mass / vegetation.
