NOTE

*As per the new 2009 update of American Diabetes Association regarding HbA1C & Mean Blood Glucose relationship.

This test is used to monitor diabetic patients compliance with the therapeutic regimen and long term blood glucose control. It's level is proportional to both the average blood glucose concentration and the life span of the red blood cells (RBC) in circulation. HbA1c values are free of day to day glucose fluctuations and are unaffected by exercise or recent food intake.
