Dear MR. SOLANKI KISHOR HIRALAL,

Thanks for booking Health Checkup and we have required following document for confirmation of booking health checkup.

1. HRM Letter

Please note following instruction for HRM letter.

1. For generating permission letter for cashless health check-up in the HR Connect, the path to be followed is given below:

a) Employee Self Service-> Reimbursement-> Reimbursement application ->Add New value ->Reimbursement Type: Mandatory Health Check-up ₹€" Click Add

b) Select Financial Year 2022-23, Self or Spouse, Claim Type - Cashless and Submit

c) After submission, click print button to generate Permission Letter

Booking Date : 30-03-2023

Health Check up Name : Medi-wheel Full Body Health Checkup Male Below 40

Name of Diagnostic/Hospital : Savaikar Hospital

Address of Diagnostic/Hospital : Warkhandem, Ponda -403401

✓ **Appointment Date** : 08-04-2023 ✓

Preferred Time : 8:00am-9:00am

Member Information			
Booked Member Name	Age	Gender	Cost(In INR)
MR. SOLANKI KISHOR HIRALAL	25	Male	Cashless
Total amount to be paid		Cashless	

We will get back to you with confirmation update shortly. Please find the package details as attached for your reference.

Package Name : Medi-wheel Full Body Health Checkup Male Below 40 - Includes (37)Tests

Tests included in this Package : Ecg, TSH, X-ray Chest, Stress Test (tmt)/ 2d Echo, Blood Sugar Postprandial, A:g Ratio, Blood Group, Total Cholesterol, Triglycerides, Fasting Blood Sugar, Ultrasound Whole Abdomen , Glycosylated Haemoglobin (hba1c), Hdl, Vldl, Urine Analysis, LDL, Total Protine, General Consultation, HDL/ LDL ratio,

THYROID FUNCTION TEST

<u>PARAMETER</u>	<u>RESULTS</u>	<u>BIOLOGICAL REF RANGE</u>	<u>METHOD</u>
Total T3, Serum	1.9	1.3-3.1 nmol/l	ECLIA
NOTE: The unbound fraction of total T3 concentrations, free triiodothyronine (FT3) is metabolically active hence, more useful than measuring total T3 as altered levels of total T3 occur due to changes in T3 binding proteins, especially TBG as in case of normal pregnancy and steroid therapy.			
Total T4, Serum	147.9	66-181 nmol/l	ECLIA
NOTE: T4 circulates in the blood as an equilibrium mixture of free and protein bound hormone. FT4 is a better indicator of thyroid hormone action than Total T4 because it is not affected by changes in Thyroxine Binding Globulin (TBG) or other Thyroxine Binding Proteins like in illness, drug intake or pregnancy.			
sensitiveTSH, Serum	1.67	0.35-5.5 microu/ml	ECLIA

Use a QR Code Scanner Application To Scan the Code

TT

Interpretation:

A thyroid panel is used to evaluate thyroid function and/or help diagnose various thyroid disorders.

Clinical Significance:

- 1) TSH Values between high abnormal upto 15 microlU/ml should be correlated clinically or repeat the test with new sample as physiological factors can give falsely high TSH.
- 2) TSH values may be transiently altered because of non thyroidal illness like severe infections, liver disease, renal and heart severe burns, trauma and surgery etc.

TSH	FT4 / T4	FT3 / T3	Interpretation
High	Normal	Normal	Subclinical hypothyroidism, poor compliance with thyroxine, drugs like amiodarone, Recovery phase of non-thyroidal illness, TSH Resistance.
●	Low	Low	Hypothyroidism, Autoimmune thyroiditis, post radio iodine Rx, post thyroidectomy, Anti thyroid drugs, tyrosine kinase inhibitors & amiodarone, amyloid deposits in thyroid, thyroid tumors & congenital hypothyroidism.
Low	High	High	Hyperthyroidism, Graves disease, toxic multinodular goiter, toxic adenoma, excess iodine or thyroxine intake, pregnancy related (hyperemesis gravidarum, hydatiform mole)
Low	Normal	Normal	Subclinical Hyperthyroidism, recent Rx for Hyperthyroidism, drugs like steroids & dopamine), Non thyroidal illness.
Low	Low	Low	Central Hypothyroidism, Non Thyroidal illness, Recent Rx for Hyperthyroidism.
High	High	High	Interfering anti TPO antibodies, Drug interference: Amiodarone, Heparin, Beta Blockers, steroids & anti epileptics.

Diurnal Variation: TSH follows a diurnal rhythm and is at maximum between 2 am and 4 am, and is at a minimum between 6 pm and 10 pm. The variation is on the order of 50 to 206%. Biological variation: 19.7% (with in subject variation)

Reflex Tests: Anti thyroid Antibodies, USG Thyroid, TSH receptor Antibody, Thyroglobulin, Calcitonin

Limitations:

1. Samples should not be taken from patients receiving therapy with high biotin doses (i.e. >5 mg/day) until atleast 8 hours following the last biotin administration.
2. Patient samples may contain heterophilic antibodies that could react in immunoassays to give falsely elevated or depressed results. this assay is designed to minimize interference from heterophilic antibodies.
