INTERPRETATIONS.

Non Diabetic level / Normal

Goal / Good Diabetic control

Fair Diabetic control

Uncontrolled Diabetes - action suggested

Hb A1c assay has been validated as a reliable indicator of mean blood glucose levels for a period of 8-12 week period. American Diabetic Association recommends the testing twice a year in patients with good control and quarterly in other cases. Results of HbA1C should be assessed in conjunction with the patient's medical history, clinical examinations and other findings.

To be correlated clinically.
