<b>Glycated Haemoglobin Estimation</b>				
<b>HbA1C</b> <i>(IT)</i>	<b>H 10.20</b>		% of total Hb 4.80 - 6.00	
<b>Estimated Avg Glucose (3 Mths)</b> <i>Calculated</i>	<b>246.04</b>	<b>mg/dL</b>		

Please Note change in reference range as per ADA 2021 guidelines.

**Interpretation :**

HbA1C level reflects the mean glucose concentration over previous 8-12 weeks and provides better indication of long term glycemc control.

Levels of HbA1C may be low as result of shortened RBC life span in case of hemolytic anemia.

Increased HbA1C values may be found in patients with polycythemia or post splenectomy patients.

Patients with Homozygous forms of rare variant Hb(CC,SS,EE,SC) HbA1c can not be quantitated as there is no HbA.

In such circumstances glycemc control can be monitored using plasma glucose levels or serum Fructosamine.

The A1c target should be individualized based on numerous factors, such as age, life expectancy, comorbid conditions, duration of diabetes, risk of hypoglycemia or adverse consequences from hypoglycemia, patient motivation and adherence.

----- End Of Report -----

# For test performed on specimens received or collected from non-NSRL locations, it is presumed that the specimen belongs to the patient named or identified as labeled on the container/test request and such verification has been carried out at the point generation of the said specimen by the sender. NSRL will be responsible Only for the analytical part of test carried out. All other responsibility will be of referring Laboratory.

## CONDITIONS OF REPORTING

1. All laboratory investigations have their limitations which are imposed by the limits of sensitivity and specificity of individual assay procedures as well as the quality of the specimen received by the laboratory. Isolated laboratory investigations never confirm the final diagnosis of the disease, but only help in arriving at a diagnosis in conjunction with clinical presentation and other related investigations.
2. The result(s) relate only to the sample(s) received.
3. The test report shall not be reproduced except in full, without written approval of the Neuberg Supratech Reference Laboratory (NSRL).
4. For any query in the report, it is suggested to contact the concerned laboratory personnel as suggested in the table to help carry out follow-up action (rechecking, repeat sampling, reflex/confirmatory testing, etc.). Neuberg Supratech Reference Laboratories (NSRL) follows a procedure of retaining & preserving samples after testing for a stipulated period. After the retention period of the sample, a fresh specimen is requested.
5. Report results are for the information of the referring doctor only.
6. For tests performed on specimens received from non - Neuberg Supratech Reference Laboratory (NSRL) locations (within and outside Indore) it is presumed that the specimen belongs to the patient named or identified, such verification having been carried out at the point of generation of the said specimen.
7. A test requested might yield 'INCOMPLETE RESULTS' for various technical reasons and this response will appear against the test name followed by detailed comment at the end of the report. It is expected that a fresh specimen will be sent for the purpose of reporting on the same parameter(s).
