Organization :

Test Name	Results	Units	Biological Ref-Interval
GLYCATED HAEMOGLOBIN (HbA1c)	5.00	%	
ESTIMATED AVERAGE GLUCOSE	97	mg/dl	

EXPECTED RESULTS :

Non diabetic patients & Stabilized diabetics	: 4.5 % to 6.0 %
Good Control of diabetes	: 6.1 % to 7.0 %
Fair Control of diabetes	: 7.1 % to 8.0 %
Poor Control of diabetes	: 8 % and above

The glycosylated hemoglobin assay has been validated as a reliable indicator of mean blood glucose levels for a period of 8-12 week period prior to HBA1C determination. ADA recommends the testing twice a year in patients with stable blood glucose, and quarterly, if treatment changes, or if blood glucose levels are unstable.

Test Name	Results	Units	Biological Ref-Interval
THYROID PROFILE			
Triiodothyronine (T3) (ECLIA)	72.20	ng/dl	60 - 181
Thyroxine (T4) (ECLIA)	6.10	ug/dl	3.2 - 12.6
THYROID STIMULATING HORMONE (TSH) (ECLIA)	2.00	uIU/ml	0.35 - 5.5

Interpretation Note:

Thyroid Stimulating Hormone (TSH) is a highly effective screening assay for thyroid disorders. In patients with an intact pituitary-thyroid axis, TSH provides a physiologic indicator of the functional level of thyroid hormone activity. Increased TSH indicates inadequate thyroid hormone, and suppressed s-TSH indicates excess thyroid hormone. Transient s-TSH abnormalities may be found in seriously ill, hospitalized patients, so this is not the ideal setting to assess thyroid function. However, even in these patients, s-TSH works better than total thyroxine (an alternative screening test). when the s-TSH result is abnormal, appropriate follow-up tests T4 & free T3 levels should be performed. If TSH is between 5.0 to 10.0 & free T4 & free T3 level are normal then it is considered as subclinical hypothyroidism which should be followed up after 4 weeks & If TSH is > 10 & free T4 & free T3 level are normal then it is considered as overt hypothyroidism.

Serum triiodothyronine (T3) levels often are depressed in sick and hospitalized patients, caused in part by the biochemical shift to the production of reverse T3. Therefore, T3 generally is not a reliable predictor of hypothyroidism. However, in a small subset of hyperthyroid patients, hyperthyroidism may be caused by overproduction of T3 (T3 toxicosis). To help diagnose and monitor this subgroup, T3 is measured on all specimens with suppressed s-TSH and normal FT4 concentrations.

Normal ranges of TSH & thyroid hormones vary according trimester in pregnancy.

TSH ref range in Pregnancy	Reference range (microIU/ml)
First trimester	0.24 - 2.00
Second trimester	0.43-2.2
Third trimester	0.8-2.5

REF BY-

XRAY CHEST (PA VIEW)

Bilateral lung fields appear clear.
Trachea & mediastinum appear normal in position.
Both hila appear normal in size and are symmetrical.
Transverse cardiac diameter is within normal limits.
Great vessels appear normal.
Both CP angles appear clear. Normal position and contour of diaphragms noted.
Bony rib cage and soft tissue shadows appears normal.

(Adv: clinical correlation and further investigation)

REF BY

LIVER: is normal in size (14.6cm) and shows homogeneous echotexture.
No evidence of intrahepatic biliary radicles dilatation / focal space occupying lesion.
The portal vein and common bile duct show normal caliber.

GALL BLADDER: distended and shows smooth walls. Wall thickness appears normal.
No evidence of sludge/ calculus . No evidence of pericholecystic collection.

SPLEEN: normal in size and shows normal echopattern.

PANCREAS: Normal in size , shape and position.
Parenchyma is homogenous.

KIDNEYS: Both the kidneys are normal in size , shape and location. Both show normal cortico- medullary differentiation.

Right kidney – measures 10.7 x 3.4 cm
Left kidney – measures 10.4 x 3.6 cm

No evidence of hydronephrosis or calculus.

URINARY BLADDER: is partially distended with smooth walls.
No evidence of diverticulum or calculus

PROSTATE: is normal in size and shows normal homogeneous echotexture

No evidence of ascites / pleural effusion.

IMPRESSION:

- **Multiple gas filled bowel loops are seen**
- **Rest of the abdominal organs appears normal.**

(Adv- clinical correlation , further evaluation)
