

LETTER OF APPROVAL / RECOMMENDATION

To,

The Coordinator,  
Mediwheel (Arcofemi Healthcare Limited)  
Helpline number: 011- 41195959

Dear Sir / Madam,

**Sub: Annual Health Checkup for the employees of Bank of Baroda**

This is to inform you that the following employee wishes to avail the facility of Cashless Annual Health Checkup provided by you in terms of our agreement.

PARTICULARS	EMPLOYEE DETAILS
NAME	MRS. JAISWAL SMRITI
EC NO.	91572
DESIGNATION	SINGLE WINDOW OPERATOR A
PLACE OF WORK	NEW DELHI, NAWADA
BIRTHDATE	09-11-1989
PROPOSED DATE OF HEALTH CHECKUP	28-08-2021
BOOKING REFERENCE NO.	21S91572100003020E

This letter of approval / recommendation is valid if submitted along with copy of the Bank of Baroda employee id card. This approval is valid from **27-08-2021** till **31-03-2022**. The list of medical tests to be conducted is provided in the annexure to this letter. Please note that the said health checkup is a **cashless facility** as per our tie up arrangement. We request you to attend to the health checkup requirement of our employee and accord your top priority and best resources in this regard. The EC Number and the booking reference number as given in the above table shall be mentioned in the invoice, invariably.

We solicit your co-operation in this regard.

Yours faithfully,

Sd/-

**Chief General Manager**

REFERRED BY	DR. PANKAJ N SURANGE	REPORT DATE	28.08.2021 SERIAL.NO:-11215259

## X-RAY CHEST - PA VIEW

Lung fields appear grossly clear. No definite focal parenchymal lesion is seen.

Cardiac silhouette appears normal in size.

Bilateral hilar shadows appear normal.

Both CP angles are clear.

Both domes of diaphragm are normal in position and contours.

Visualized bony cage and soft tissue of thorax appear normal.

*Please correlate clinically.*

## ULTRASOUND OF WHOLE ABDOMEN

### Convex Probe was used.

### Complaining of pain in abdomen

The liver is normal in size, contour and echotexture. Intrahepatic bile ducts and CBD are not dilated. Hepatic portal veins and the IVC appear normal in caliber.

**Gall bladder** is adequately distended with normal intraluminal fluid contents. No evidence of calculus / wall thickness noted.

**Pancreas** is of normal size and contour with normal echotexture.

**Right kidney** is normal in position .It shows normal movements with respiration.

**There is thinning of the cortex.**

**Dilation of the right PCS and the entire ureter is noted. The terminal ureter shows abrupt narrowing suggestive of stricture.**

No calculus, mass seen.

**Right kidney measures- 8.49x3.11cm**

Renal artery pulsation appear normal.

**Left kidney** is normal position however is mildly increased in size suggestive of compensatory hypertrophy. .It shows normal movements with respiration.

Cortical thickness is normal .

No calculus, mass or hydronephrotic changes seen.

**Left kidney measures- 11.94x5.30cm**

Renal artery pulsation appear normal.

Spleen is of normal size and shape. Echotexture is normal. No focal lesion is seen.

No evidence of retro-peritoneal lymphadenopathy/ ascites/ pleural effusion noted.

Uterus is actually retroverted and is normal in size. Myometrium shows few fibroids seedling.

No significant mass or lesion is noted.

**Endometrial** is normal measuring 3 mm and is in mid line.

## BIOCHEMISTRY

Test Name	Value	Unit	Normal Value
HbA1c			
HbA1c (ngsp)	5.60		Reference Range (HbA1c) :
HighPressure Liquid Chromatograpy			4.5 - 6.4 %
			Good control : 4.5 - 6.4 %
			Fair control : 6.5 - 7.4 %
			Poor control : Above - 7.5 %

COMMENTS: HbA1c is an indicator of glycemic control. HbA1c represents average glycemia over the past six to eight weeks. Glycation of hemoglobin occurs over the entire 120 day life span of the red blood cell, but with in this 120 days.Recent glycemia has the largest influence on the HbA1c value. Clinical studies suggest that a patient in stable control will have 50% of their HbA1c formed in the month before sampling, 25% in the month before that, and the remaining 25% in months two to four. Estimated Average Glucose mg/dl = (HbA1c x 35.6) - 77.3) Correlation between HbA1c and Mean Plasma Glucose (MPG) is not "perfect" but rather only this means that to predict or estimate average glucose from Hb-A1c or vice-versa is not "perfect" but gives a good working ballpark estimate. Afternoon and evening results correlate more closely to HbA1c than morning results, perhaps because morning fasting glucose levels vary much more than daytime glucose levels, which are easier to predict and control. As per IFCC recommendations 2007, HbA1c being reported as above maintaining traceability to both IFCC (mmol/mol) & NGSP (%) units.

## THYROID PROFILE

Tri-Iodothyronine Total(TT3)	1.10	ng/dL	0.80 - 2.0 All values Adults (euthyroid) 0.80-2.0 Newborns 0.73-2.88 6d - 3 mth 0.80-2.75

15-20 years 0.43-4.20

**COMMENTS:** Assay results should be interpreted in context to the clinical condition and associated results of other investigations. Previous treatment with corticosteroid therapy may result in lower TSH levels while thyroid hormone levels are normal. Results are invalidated if the client has undergone a radionuclide scan within 7-14 days before the test. Abnormal thyroid test findings often found in critically ill clients should be repeated after the critical nature of the condition is resolved. The production, circulation, and disintegration of thyroid hormones are altered throughout the stages of pregnancy

## LIQUID BASED CYTOLOGY

**SPECIMEN RECEIVED** - Liquid Bsed Preparation of the Cervical Cytology.

**ADEQUACY OF SPECIMEN** - Satisfactory for evaluation.  
Transformation Zone component seen.

**GENERAL CATEGORIZATION** - Smears studied show dispersed population of superficial, intermediate and parabasal squamous cells with normal N:C ratio, some show benign reactive changes. Mild neutrophilic infiltrate and doderlein bacilli seen.

No atypical cells/ features of malignancy noted.

**INTERPRETATION** - **Negative for intra-epithelial lesion**
