 Reg. No. MP-18747

Subject of following conditions :- The science of pathological diagnosis is based on interpretation of immunobiochemical ELISA, RIA and other reactions which are influenced by several factors. Assays are performed in accordance with standard procedures. The reported results are dependent on individual assay methods, equipment, specificity, sensitivity, drug interaction and the quality of the specimen (s) samples receiver. The most sophisticated computerized blood analyzer techniques are subject to unaccountable variations. Results of test vary from laboratory to laboratory and also in some parameters from time to time for the same patients. So the final diagnosis, conclusion should not be drawn from these test only hence kindly correlate clinically. Adviced follow up. The laboratory investigations should always be interpreted in the light of clinical features and other related investigations. Subject to corrections of typing / printing / humanly mistakes. Should the result indicate an unexpected abnormality, reconfirmation shall be sought. This report is not valid for

Ref. By:	ALEXIS HOSPITAL	Date:	11/02/2023

USG WHOLE ABDOMEN

- **Liver** normal in size, shape and raised echotexture. No evidence of any focal lesion is seen. No intrahepatic biliary dilatation is seen. Portal Vein, CBD are not dilated.
- **Gall bladder** well distended and is normal. No evidence calculi/wall thickening is seen.
- **Pancreas** Head, part of body visualized normal.
- **Spleen** measures 9.5 cm, normal in size, shape and echotexture.
- **Right kidney** measures approximate 10.1 x 3.7 cm. Normal in size, shape & echotexture. CM differentiation is maintained. PCS compact. **Left kidney** measures approximate 10.2 x 4.1 cm. Normal in size, shape & echotexture. CM differentiation is maintained. PCS compact.
- **Urinary Bladder** – Well distended. Normal wall thickness with normal contents.
- **Prostate**:- Normal in size, shape and echotexture.
- No ascitis. No retroperitoneal lymphadenopathy.
- The small and large bowel loops appear normal in caliber and peristalsis with normal wall thickness.

Impression: USG study reveals grade I fatty liver. No other significant abnormality.
