**CYTOLOGY**

CYTOPATHOLOGY NO.: C- 1409/22

SPECIMEN SUBMITTED: 2 Conventional cervical smears (One smear prepared).

SPECIMEN ADEQUACY: Satisfactory for evaluation; Endocervical /transformation zone component present.

**MICROSCOPIC EXAMINATION:**

Squamous cell population:

Superficial & Intermediate - Occasional present.

Parabasal - Predominantly present.

Metaplastic squamous cells - Present.

Inflammation - Moderate.

Atypical cells - Occasional squamous cell show significant nucleomegaly.

Koilocytic atypia on tumor diathesis are not seen.

Background bacterial flora - Maintained.

**INTERPRETATION:**

- Epithelial cell abnormality, Squamous:

- Atypical squamous cells - undetermined significance (ASC-US) with features of atrophy with inflammation.

**COMMENT:**

1. The smears are reported using the Bethesda system (2014) for reporting cervical cytology.
2. Cervical cytology is a screening test primarily for squamous cancer and its precursors and has associated false-negative and false-positive results. Technologies such as liquid-based preparations may decrease but will not eliminate all false negative results. Follow-up of unexplained clinical signs and symptoms is recommended to minimize false-negative results.
3. In patients with squamous or glandular intraepithelial abnormalities, further diagnostic follow-up procedures, such as HPV testing, colposcopy / biopsy with endocervical sampling are suggested, as clinically indicated.

1. All reports are for interpretation by the treating doctor only and have to be viewed and correlated with clinical examination and other investigations. 2. All investigations have their limitation which is imposed by the limits to sensitivity and specificity of individual assay procedures as well as the quality of the specimen received by the laboratory. Isolated laboratory investigations never confirm the final diagnosis of the disease. 3. If the result (s) of tests are alarming or unexpected the doctor is advised to contact the lab immediately for needful and necessary action.
