BIOCHEMISTRY

TEST

HbA1c

Glycosylated Haemoglobin % (Hb : 6.34

Alc)

UNITS

REFERENCE RANGE

Normal: 4.2 to 6.2

Good control:5.5 to 6.8 Fair control: 6.8 to 7.6

Poor control: > 7.6 Unit: %

Mean Plasma Glucose

: 135.26

RESULT

NOTES:

1. The HbA1c test shows your average blood sugar for last 3 months.

2. The HbA1c test does not replace your day-to-day monitoring of blood glucose. Use this test result along with your daily test results to measure your overall diabetes control.

How does HbA1c works?

The HbA1c test measures the amount of sugar that attaches to protein in your red blood cells.

RBCs live for about 3 months, so this test shows your average blood sugar levels during that time.

Greter the level of sugar & longer it is high, the more sugar that will attach to RBCs.

Why is this test so important?

Research studies demonstrated that the closer to normal your HbA1c level was, the less likely your risk of developing the long-term complications of diabetes. Such problems include eye disease, nerve damage, heart and blood vessel disease and kidney problems. Who should have the HbA1c test done?

Everyone with diabetes can benefit from taking this test. Knowing your HbA1c level helps you and your doctor decide if you need to change your diabetes management plan.

How often should you have a HbA1c test?

You should have this test done when you are first diagnosed with diabetes.

Then at least twice a year if your treatment goals are being met & blood glucose control is stable.

More frequent HbA1c testing (4 times / year) is recommended if your therapy has been recently changed or if you are not

Date: 29.03.2022

PATIENT'S NAME: MRS. SHALINI REF. BY: GREEN CITY HOSPITAL

AGE: 31Y SEX: FEMALE

<u> Ultrasonography : Whole Abdomen</u>

Liver: Appears normal in size measures 13.2 cm in long axis In mid clavicular line and shows mildly raised hepatic echotexture with normal visualization of intrahepatic vessel walls. Margins are smooth and regular. Intra and extra hepatic billiary and vascular channels are normal. No evidence of any focal or diffuse mass lesion seen. Gaseous distension of bowel loops noted.

Gall Bladder: Reveal a clear anechoic lumen. Its wall of normal thickness. No pericholecystic pathology seen. CBD & PV are of normal calibre.

Right Kidney: Normal in size, shape & echotexture measures 10.2 x 4.1 cm. Cortical echotexture appears to be normal. Cortico-medullary differentiation is maintained. No hydronephrosis, scarring seen. Tiny renal concretion 3mm at interpole region.

Left Kidney: Normal in size, shape & echotexture measures 10.2 x 4.1 cm. Cortical echotexture appears to be normal. Cortico-medullary differentiation is maintained. No hydronephrosis, scarring seen. Tiny renal concretion 3mm at interpole region.

Spleen: Is normal in size, shape and echotexture. eli heing Watters

Pancreas: Appear to be normal in shape, size & echotexture. Pancreatic duct is not dilated.

Urinary Bladder: Is central smooth in contour and reveal a clear lumen. Their walls are of normal thickness.

Uterus: Is anteverted and normal in size shape and echotexture measures 8,2 x 4.2 x 3.5 cm. Endometrial echo is in midline measures 13 mm. Cervix appears normal. Anterior myometrial c section scarring noted and anterior myometrial intramural fibroid of size 9.1 x 10 mm

Right Ovary: Visualized normal in size, shape and echotexture.

<u>Left Ovary</u>: Visualized normal in size, shape and echotexture.

No evidence of obvious adnexal mass lesion is seen. No evidence of any free fluid/lymphadenopathy. No evidence of bowel wall thickening noted.

Impression: USG Study Reveals:

- Normal sized liver with grade I fatty infiltration and Gaseous distension of bowel loops.
- Bilateral tiny renal concretions.
- Anterior myometrial c section scarring and anterior myometrial intramural fibroid 9.1 x 10 mm
