GENERAL INFORMATION ABOUT YOUR SPECTACLES :

1. Wear your glasses regularly and follow the instructions as advised
2. It may take a few days to adjust to the new number/ spectacles, In case of discomfort, eye strain, headache, improper/ distorted vision etc, kindly visit the hospital.
3. Glasses / spectacles need proper care and maintenance for a long life.
 - a. Keep them clean by using the special lens cleaning solutions or with diluted soap & water
 - b. Avoid placing spectacles with lens facing down as they get scratched easily.
 - c. NEVER use paper towels, tissue, or napkins to dry your lenses. All of these materials have a textured surface and can easily scratch your lenses.
 - d. Also refrain from using the tail of your shirt.
4. Your number may change by time so regular follow up is advisable preferably every 6 months. In case you notice any difficulty in seeing clearly get your vision checked.
5. In case you have distant & near vision glasses, ask for bifocal/ progressive lenses.
6. Bifocal lenses have upper segment for distance & lower segment for near vision.
7. Progressive lenses provide focused vision for distance, near and intermediate vision.
8. Contact lenses number may slightly vary from the one given above, If interested in contact lenses kindly ask for assistance.

Diabetic fair control = 7.0 - 7.9 %

Diabetic poor control = > = 8.0 %

Comments:-

Haemoglobin A1c (HbA1c) correlates with a time weighted average of plasma glucose values over the previous 3 to 10 weeks. The measurement of HbA1c is therefore a reflection of glucose control over a far longer period than a blood glucose value and it remains unaffected by the short term fluctuation in blood sugar levels.
