## REPORT OF ECHOCARDIOGRAM

### Dimensions

(Figurs in the Bracket inducate the normal adult values)

| <u>M. Mode Data</u> |    | <u>Normal Range</u> |          | <u>Normal Range</u> |
|---------------------|----|---------------------|----------|---------------------|
| AOD                 | 28 | (20-40 mm)          | EPSS     | 4.9 (0-10mm)        |
| AOEX                | 18 | (15-25 mm)          | IVS (d)  | 12 (6-11mm)         |
| LA                  | 32 | (20-40 mm)          | LVPW (d) | 12 (6-11mm)         |
| LVIDd               | 50 | (35-56 mm)          | EDV      | (85 +/- 5 ml)       |
| LVIDs               | 32 | (24-42 mm)          | ESV      | (15-50 ml)          |
| RV(d)               | 13 | (6-23 mm)           | SV       | (20-50 ml)          |
| DE                  | 12 | (15-25 mm)          | FS       | 36 (25-50 %)        |
| EF SLOPE            | 80 | (50-150 mm/sec)     | LVEF     | 66 %                |

### Findings:

1. Left ventricular cavity size and wall thickness increased
2. No regional wall motion abnormality.
3. Good left ventricular systolic function.
4. No pericardial effusion.
5. No pulmonary artery hypertension.
6. Intact interatrial septum and interventricular septum
7. No intracardiac mass.
8. All cardiac valves are normal.
9. Good right ventricular systolic function.

TAPSE 28
