For routine urine analysis, 15 ml of midstream clean catch urine sample collected in wide mouth open container with tight fitting lid is desirable. Delayed transport, temperature and humidity can deteriorate urine sample quality. Urine routine microscopic examination is a primary investigation for suspected renal disease, urinary tract infection, detection of metabolic disorders such as diabetes mellitus, differential diagnosis of jaundice, and plasma cell dyscrasia. Urine Glucose and albumin measurement at regular interval are essential for analysing the progression of diabetic nephropathy from reversible to irreversible stage.

Finish				1	107	120/70	128	3

Findings: Exercise Time : 09:01 mins
 Max HR attained : 163 bpm 86 % of Target 189 bpm
 Max BP : 140/90mmHg
 Max Workload attained : 12.1 METs (Good Effort Tolerance)
 Reason for Test Termination: Patient Completed Test

No significant ST segment changes noted during exercise or recovery stages.
 No Angina / Arrhythmia / S3 / Murmur
 Final Impression : Test is negative for inducible ischaemia.

USG OF ABDOMEN AND PELVIS

Liver appears normal in size, shape and shows normal echotexture. No evidence of focal SOL or dilation of IHBR seen. IVC, Portal vein and periportal region appear normal.

Gallbladder appears normal. No e/o calculi or wall thickening seen.

Spleen appears normal in size and echotexture. No evidence of focal SOL seen.

Pancreas appears normal in size and echotexture. No e/o SOL or inflammation seen.

Paraortic region appears normal. No e/o abnormal lymphadenopathy seen.

Right kidney appears normal in size (89X44 mm) and shows normal echopattern. Cortex and collecting system appears normal. No calculi or obstructive uropathy.

Left kidney appears normal in size (103X46 mm) and shows normal echopattern. Cortex and collecting system appears normal. No calculi or obstructive uropathy.

Urinary Bladder appears normal. No e/o calculus or wall thickening noted.

Prostate appears normal in size and echopattern. No e/o inflammation seen.

Caecum and colon appears loaded with fecal material.

Appendix is not seen, due to bowel gas. No evidence of collection or lump in RIF.

No evidence of free fluid or collection is seen in peritoneal spaces.

Comments : No abnormality detected.

Thank you for the reference.
