Hi Shree Ram multispeciality Hospital,

The following booking has been confirmed. It is requested to honor the said booking & provide priority services to our client

Hospital Package : Mediwheel Full Body Annual Plus Check Advanced - Female

Patient Package

Name

: Mediwheel Full Body Health Checkup Male Above 40

Hospital Address:

Gate No.1, Basant Vihar, near Railway Under Bridge, Gondwara Chowk,

Gudhiyari, Raipur, Chhattisgarh- 492001

: 8895818525 Contact Details

Appointment Date: 24-08-2024

Confirmation

Status

: Booking Confirmed

Preferred Time : 8:30am

Member Information				
Booked Member Name	Age	Gender		
Jayanti Sa	63 year	Female		

We request you to facilitate the employee on priority.

Thanks, Mediwheel Team

A/G RATIO	1.49				

Clinical Significance

ALT is an enzyme found in the liver that helps your body metabolize protein. When the liver is damaged, ALT is released int the bloodstream and levels increase.

AST is an enzyme that helps metabolize alanine, an amino acid. Like ALT, AST is normally present in blood at low levels. A increase in AST levels may indicate liver damage

or disease or muscle damage.

ALP is an enzyme in the liver, bile ducts and bone. Higher-than-normal levels of ALP may indicate liver damage or disease, such as a blocked bile duct, or certain bone

Albumin is one of several proteins made in the liver. Your body needs these proteins to fight infections and to perform other

functions. Lower-than-normal levels of albumin and

total protein might indicate liver damage or disease.

Bilirubin is a substance produced during the normal breakdown of red blood cells. Bilirubin passes through the liver and is excreted in stool. Elevated levels of bilirubin

(jaundice) might indicate liver damage or disease or certain types of anemia.

Mrs JAYANTI SA Age: 64 YearsSex: Female

Sample Collected At:
Ref. By: Dr. AJIT KUMAR (MD)

UH ID NO. – SRMH - 2408882

Registered: 24 Aug, 24 01:35 PM Collected: 24 Aug, 24 01:30 PM Reported: 24 Aug, 24 07:30 PM

TFT

Thyroid Function Test (TFT)

Investigation	Observed Value	Unit	Biological Reference Interval
THYROID SERUM HORMONS			
Serum Triiodothyronine (T3)	1.15	ng/mL	0.89 - 1.87
Serum thyroxine (T4)	11.19	ug/dL	5.1 - 14.28
Thyroid Stimulating Hormone (TSH)	2.42	μIU/mL	0.66 - 5.67

Comments:-

- (i) Ethnicity, iodine intake, gender, age, body mass index and Exercise influences the reference range of Thyroid hormones and serum TSH concentrations.
- (ii) Changes in Thyroid Hormones (especially T3) and TSH may be seen as early as 24 hours after the onset of non-thyroidallillness. (Poor nutrition/starvation, sepsis, burns, malignancy, myocardial infarction, post-surgery, and with chronic liver and renal disease)
- (iii) Serum total T4 and T3 concentrations increase to approximately 150% of non-pregnant values this occurs during the first half of pregnancy and is maintained thereafter until parturition. Free T4 concentrations also change during pregnancy: in the first trimester a transient rise is often observed.
- (iv) Measurement of FT4 and FT3 is best avoided in patients receiving heparin therapy. (When indicated, blood sample should be taken 10 hours after the last injection of heparin, and analyzing it without delay, can reduce the risk of artifactual hyperthyroxinaemia.)
- (v) Phenytoin, carbamazepine and furosemide cause artifactual increase in free T4 (FT4) and decrease in total T4.

Ref. By: Dr. AJIT KUMAR (MD)

UH ID NO. - SRMH - 2408882

Registered: 24 Aug, 24 01:35 PM

Collected: 24 Aug, 24 01:30 PM Reported: 24 Aug, 24 07:30 PM

BUN / Creatinine Ratio PANAL

Investigation	Observed Value	Unit	Biological Reference Interval
BUN			
BUN	11.4	mg/dL	7.00 - 20.00
	0.79	mg/dL	0.55 - 1.20
Serum Creatinine	0.73	· ·	10:1 - 20:1
BUN / Creatinine Ratio	14.43		10.1 / 2011

Blood urea nitrogen (BUN) is a waste product produced when the liver breaks down protein. The kidneys then filter it out of the blood and eliminate it through urine. Creatinine is a waste product created by the breakdown of phosphocreatine, a molecule stored in muscle tissue. The kidneys filter creatinine from the blood, and its levels in the body reflect the efficiency of the kidney's excretory function. therefore, BUN and creatinine are useful markers in assessing kidney health because they help doctors evaluate the kidney's filtration rate.
