Subject: Health Check up Booking Confirmed Request(35ES7795),Package Code-, Beneficiary Code-323542
From: Mediwheel -wellness@mediwheel.in
Date: 15-11-2024, 11:55 am
To: hospital@newvrundavan.com
CC: customercare@mediwheel.in

011-41195959

Hi New Vrundavan Hospital,

The following booking has been confirmed. It is requested to honor the said booking & provide priority services to our client.

Hospital Package Name : Mediwheel Full Body Standard Plus
Patient Package Name : MediWheel Full Body Health Checkup Male 40 To 50 For Self and Spouse
Contact Details : 9767656331
Appointment Date : 20-11-2024
Confirmation Status : Booking Confirmed
Preferred Time : 09:00 AM - 09:30 AM

Member Information		
Booked Member Name	Age	Gender
RAGESHKAR YASHWANT UJIAM	44 year	Male
Kirti Yashwant Rageshwar	44 year	Female

We request you to facilitate the employee on priority.

Thanks,
Mediwheel Team

MEDICAL EXAMINATION REPORT

Date – 20/11/2024

Name : Yeshwant . Uttam . Nageshkar

Age : 48 years

Gender : Male

Temperature – 98°F Height – 158 cms Weight - 65 kg BMI – 26.04%

Chest Measurements – Chest inspiration - 94cms, Chest expiration - 93 cms,
Abdominal girth – 93 cms.

History : K/c/o HTN on Medication – Tab.Amlopin 5mg 1—0---0

Past history : Tested positive for COVID-19 infection in 2021.

2 Doses Vaccinated.

Personal history : Nil significant history

Neurological history : Nil significant history

Menstrual history : N.A.

Family history : Father – ALD [Deseased] , Mother - T2DM [Deseased].

Allergic history : Nil significant history.

Nature of work : Sedantary

Occupational history : Assistant Manager at Union Bank.

Ongoing treatment : Tab.Amlopin 5 mg 1—0---0

General examination : No Pallor, jaundice, clubbing, cyanosis,
lymphadenopathy ,pedal oedema.

Built : Normal

Nutrition : Normal

Pulse : 78 bpm

B.P: 130/80 mmHg

RS: Clear , NAD

CVS: S1S2 normal

CNS: conscious, well oriented

PA: Soft, non-tender .No organomegaly

Skin: Normal , NAD

Musculoskeletal : NAD

Vision : Complete Blindness since birth.

Colour vision : Complete Blindness since Birth .

ENT : NAD

CLINICAL BIOCHEMISTRY

Test Description	Result	Units	Biological Reference Ranges
Thyroid Profile I			
T3-Total, Tri Iodothyronine (TT3) <small>(Reference: 0.8-1.8 ng/dL)</small>	151.85	ng/dL	60 - 200
T4-Total, Thyroxine (TT4) <small>(Reference: 4.5-12.5 ug/dL)</small>	9.91	ug/dL	4.6 - 10.5
Thyroid Stimulating Hormone, (TSH) <small>(Reference: 0.4-4.0 mIU/L)</small>	3.53	mIU/dL	0.37-5.50

Thyroid Function Test Interpretation

The thyroid gland is not functioning properly due to one of a variety of disorders, then increased or decreased amounts of thyroid hormones may result. When TSH concentrations are increased, the thyroid will make and release inappropriate amounts of T4 and T3 and the person may experience symptoms associated with hypothyroidism. If there is decreased production of thyroid hormones, the person may experience symptoms of hyperthyroidism.

The following table summarizes some examples of typical test results and their potential meaning.

TSH	Total T4	Total T3	Conditions
Normal	Normal	Normal	None
Low	High	High	Hyperthyroidism
High	Normal	Normal	Mild (subclinical) hypothyroidism
High	Low	Low or normal	Hypothyroidism
Low	Normal	Normal	Mild (subclinical) hyperthyroidism
Low	High or normal	High or normal	Hyperthyroidism
Low	Low or normal	Low or normal	pituitary (secondary) hypothyroidism
Normal	High	High	Thyroid hormone resistance syndrome

Note:

- The above test results alone are not diagnostic but will prompt a health practitioner to perform additional testing to investigate the cause of the excess or deficiency and thyroid disorder. As examples, the most common cause of hyperthyroidism is Graves disease and the most common cause of hypothyroidism is Hashimoto thyroiditis.
- Recommended test for T3 and T4 as unbound fraction or free levels as it is metabolically active.
- Physiological rise in total T3 / T4 levels is seen in pregnancy and in patients on estrogen therapy.

Reason for Echo : Routine checkup

Examined By : Dr. Digambar Naik

Clinic Observations :

Echocardiography Report

Echocardiographic study was done by using:

1. M Mode Echocardiography
2. Two Dimensional Echocardiography
3. Conventional and Colour Doppler Echocardiography
4. Tissue Doppler
5. Speckle Tracking and Strain Imaging

Echo Window: Good

Following observations were obtained

Valves

- Mitral valve** : Normal in size and contractility
- Aortic valve** : **Aortic Regurgitation Severity** : Trace (Trivial)
Aortic Annulus Calcified : Mild
- Pulmonary valve** : Normal in size and contractility
- Tricuspid valve** : **Regurgitation Severity** : Trace

Chambers

- Left atrium** : Normal in structure and opens and closes normally
- Left ventricle** : **Ventricular Shape Concentric Hypertrophy** : Mild
- Right atrium** : Normal in structure and opens and closes normally
- Right ventricle** : Normal in structure and opens and closes normally

Artery Relation

- Aorta** : **Aorta Dilatation** : Ascending aorta
- Pulmonary Artery** : Normal in size and structure

In Relation

IVC : Normal in size and contractility
Pulmonary Vein : Normal in size and contractility

Regional Wall Motion

Anterior wall : Contracts well
Posterior wall : Contracts well
Inferior wall : Contracts well
Lateral wall : Contracts well
Anterior septum : Contracts well
Inferior septum : Contracts well
Apex : Contracts well

Ventricular Function

Left Ventricular Function : Normal
Right Ventricular Function : Normal

Pericardium

Pericardium : Normal
Pericardial Effusion : Nil

Intracardiac

Intracardiac Clots : Nil
Intracardiac Tumour : Nil
Interatrial Septum : Normal
Interventricular Septum : Normal

Ejection Fraction

Value Of EF : 61.00 %

Speckle Tracking

Average peak systolic strain is : -17.70 %
Reduced peak systolic strain over : None

Special Observation

Nil

Impressions

No Diastolic Dysfunction
No Regional wall motion abnormality noted

RV Function
Normal PA pressures
No vegetation
No pericardial effusion noted
No Intracardiac clots seen
Normal resting left ventricular systolic function with Ejection Fraction 61%

Concentric left ventricular hypertrophy
Trivial aortic regurgitation
Calcification of aortic Annulus
Trivial tricuspid regurgitation
Dilatation of ascending aorta

Conclusions

Degenerative changes
Hypertensive changes
