BILATERAL BREAST SCAN

All four Quadrants of each breast were scanned, followed by evaluation of the subareolar region and axillary tails.

Bilateral breast parenchyma display a uniform echogenicity and echo texture of the fibrofatty and glandular components, which are in normal proportion for this age and parity.

Both Axillary tails are also normal.

No abnormal axillary lymphnodes noted.

Impression:

- **Right breast-- a fibroid seen in 3'o clock position measuring 1.2x0.5cm.**
- **Left breast-- a cystic structure seen in 2'o clock position measuring 0.9x0.7cm .**

*To correlate clinically & with other investigations.
