In addition, as TSH directly affect thyroid function, malfunction of the pituitary or the hypothalamus influences the thyroid gland activity. Disease in any portion of the thyroid-pituitary-hypothalamus system may influence the level of T3 or T4 in the blood. In Primary hypothyroidism, TSH levels are significantly elevated, while in secondary and tertiary Hypothyroidism, TSH levels may be low. In addition, In Euthyroid sick Syndrom, Multiple alterations in serum thyroid function test findings have been recognized.
