#### BLOOD GROUP (ABO)

Forward and Reverse grouping (Slide & Tube)

A

#### Rh typing

POSITIVE

#### NOTE :

- \* Apart from major A,B,H antigens which are used for ABO grouping and Rh typing, many minor blood group antigens exist. Agglutination may also vary according to titre of antigen and antibody.
- \* So before transfusion, reconfirmation of blood group as well as cross-matching is needed.
- \* Presence of maternal antibodies in newborns, may interfere with blood grouping.
- \* Auto agglutination (due to cold antibody, falciparum malaria, sepsis, internal malignancy etc.) may also cause erroneous result.

PSA is principally produced by the glandular epithelium of the prostate, and is secreted in the seminal fluid. PSA is also present in urine and blood. PSA acts on seminal fluid to fluidify and increase sperm mobility. PSA levels rise in prostatic pathologies such as benign prostatic hyperplasia (BPH) or prostate cancer.
