Reported On : 31/03/2023 12:57:13

Drawn On : 30/03/2023 15:18:59

Received On : 30/03/2023 15:38:49

CYTOPATHOLOGY REPORT

Cyto No. : 47/23
Report Of : PAP SMEAR (CONVENTIONAL)
Site : UTERINE CERVIX
No Of Smear : 2

Microscopic Examination

Received smears are adequate for assessment and show normal superficial, intermediate and parabasal cells.

Normal endocervical cells in sheets and clusters are seen; hence endocervical/transformation zone component present in the smear.

No evidence of any epithelial cell abnormality in the received smears.

Specimen Adequacy:

Satisfactory for evaluation; endocervical/transformation zone present.

Interpretation:

Negative for intraepithelial lesion or malignancy.

Final Impression

Specimen Adequacy:

Satisfactory for evaluation; endocervical/transformation zone present.

Interpretation:

Negative for intraepithelial lesion or malignancy.

Comments

Kindly correlate with the clinical and radiological findings.

End Of Report

Pathologist
