Dear Sir,

Tie-up arrangement for Health Checkup under Health Checkup

35-40 Female

Shri/Smt./Kum. SHINDE, SONALI MAHESH

P.F. No. 602127

Designation : Asst Manager

Checkup for Financial Year

2023-
2024

Approved Charges Rs.

3000.00

The above mentioned staff member of our Branch/Office desires to undergo Health Checkup at your Hospital/Centre/Clinic, under the tie-up arrangement entered into with you, by our bank.

Please send the receipt of the above payment and the relevant reports to our above address.

Thanking you,

Yours Faithfully,

(Signature of the Employee)

BRANCH MANAGER/SENIOR MANAGER

PS. : Status of the application - Sanctioned

Laboratory Report

Biochemistry

T3, T4, TSH

Tests	Results	Biological Reference Range	Units
Triiodothyronine, Total (T3) (Serum,CMIA)	1.31	1.30 - 3.10	nmol/mL
Thyroxine, Total (T4) (Serum,CMIA)	97.6	59 - 154	nmol/mL
TSH Ultra Sensitive (Serum,CMIA)	0.86	0.27 - 4.8	μIU/mL

Comment

T3 or 3,5,3-triiodothyronine is a hormone synthesized and secreted from the thyroid gland, and formed by peripheral deiodination of thyroxine (T4). The determination of it in serum is essential in assessing thyroid functions. T3 is secreted by thyroid glands and circulates in the blood stream; mostly bound to the plasma protein, thyroxin binding globulin (TBG) and prealbumin and albumin.

T4 or Thyroxine or 3,5,3,5-tetraiodothyronine is a hormone synthesized and secreted by the thyroid gland and plays an important role in regulating metabolism. In the peripheral tissues it act as a prohormone which is further metabolized to another most active thyroid hormone, tri-iodothyronine (T3) and other inactive metabolites such as reverse T3.

TSH or Thyroid-stimulating hormone is a hormone synthesized and secreted by Pituitary gland. TSH is glycoprotein with two non-covalently bound alpha and beta subunits. The beta subunit of TSH is unique, which results in the specific biochemical and immunological properties of this hormone. The ability to quantitate circulating levels of TSH is important in evaluating thyroid function. It is especially useful in the differential diagnosis of primary (thyroid) from secondary (pituitary) and tertiary (hypothalamus) hypothyroidism.

HbA1c (Glycated Haemoglobin) 5.4 % 4.0 - 6.2

REMARKS-

In vitro quantitative determination of HbA1c in whole blood is utilized in long term monitoring of glycemia. The HbA1c level correlates with the mean glucose concentration prevailing in the course of the patient's recent history (approx - 6-8 weeks) and therefore provides much more reliable information for glycemia monitoring than do determinations of blood glucose or urinary glucose. It is recommended that the determination of HbA1c be performed at intervals of 4-6 weeks during Diabetes Mellitus therapy. Results of HbA1c should be assessed in conjunction with the patient's medical history, clinical examinations and other findings.

The American Diabetes Association(ADA) recommendations are summarized as below:

Ref Range for HBA1c (In %):

Non diabetic Adults (Age \geq 18 years) < 5.7

At risk (Pre-Diabetic) : 5.7- 6.4

Diagnosing Diabetes: \geq 6.5

HbA1c goals in treatment of diabetes:

Ages 0-6 years: 7.6% - 8.4%

Ages 6-12 years: <8%

Ages 13-19 years: <7.5%

Adults: <7%
