Blood Group Report

Name of the Patient : DIWYESH K PATIL

Age : 29 Year Gender : Male

Patient Sample ID : JJ22-R09139

UHID : ~~0122-001532~~ 325413

Referred By Hospital : Wockhardt Super Speciality Hosp

Referred By Consultant :

Date & Time of Sample Receiving :

Sample Received : EDTA / PLAIN

Investigation Required : Blood Group Report

Adequacy of Sample : Adequacy

Date of Receipt of Sample : 06/Aug/2022

Date of Release of Report : 06/Aug/2022 12:43 PM

Report

Forward Red Cell Blood Group : B Rh Negative

Reverse Serum Blood Group : B

Rh Typing : Negative

Opinion : If there is any Blood group discrepancy, it may be because of the irregular antibody present in the blood. This requires proper evaluation of Antibody Identification and Rh Phenotyping.

Remark :

Principle of the Test :

As the Matrix gel card containing red blood cells is centrifuged under specific conditions, the red blood cells sensitized with antibody will agglutinate in the presence of the Anti-Human Globulin reagent in the gel matrix and will be trapped in the gel column. The red blood cells, which do not react are not trapped in the gel matrix and are pelleted at the bottom of the column.

The reactions are then read and graded according to their reactivity pattern.
