<b>Name</b>	Mr. SANJEEV KUMAR			<b>Reg. On</b>	13/Feb/2023
<b>Ref. Dr.</b>				<b>Approved On</b>	13/Feb/2023 10:15AM
<b>Rpt. Centre</b>	Self			<b>Printed On</b>	16/Feb/2023 04:11PM

Test Name	Value	Unit	Biological Reference Interval
-----------	-------	------	-------------------------------

<b>HbA1c (Glycosylated haemoglobin), EDTA whole blood</b>	5.7	%	4.0 - 6.0
<i>Method : HPLC</i>			
<b>Estimated average plasma Glucose</b>	116.69	mg/dL	65 - 136
<i>Method : Calculated</i>			

The test is approved by NISAP for patient sample testing.

**Interpretation:**

Metabolically normal patients	%	4.0 - 6.0
Good control:	%	< 7.0
Fair control:	%	7.0 - 8.0
Poor control:	%	> 8.0

Glycosylated haemoglobin or HbA1C is a reliable indicator of mean plasma glucose levels for a period of 8-12 weeks preceding the date on which the test is performed and is a more reliable indicator of overall blood sugar control in known diabetic patients than blood sugar levels. A value of 4-6 % is usually seen in metabolically normal patients, however diabetes with very good control can also yield similar values. The HbA1c test, thus can not be used to differentiate between diabetic patients with very good control over the plasma glucose levels from metabolically normal, non-diabetic subjects as both groups may reveal very similar values in the assay.
