AICVD RISK SCORE REPORT								
RIS	SK STATUS	YOUR SCORE		ACCEPTAE	SLE SCORE			
	Low Risk	3			7			

Your cardiovascular disease risk in the next 10 years is within the Normal limits for your age and gender

The AICVD risk score developed by Apollo Hospitals is a novel artificial intelligence -based risk scoring system that predicts your risk of having Coronary Artery Disease (CAD) related events in the next ten years. This scoring system uses Indian data and has been validated by multiple national and international institutions. This risk score is more than 92% accurate and has been compiled based on your physical parameters, heart health attributes, lifestyle and medical history. **Note:** The risk category is determined through the ratio between guest score and acceptable score at multiple decimal points. The outputs are shown in whole numbers.

Based on your AICVD risk score you are advised the following:

- Follow the guidance and education on lifestyle and dietary management provided through the ProHealth program. Maintain a healthy BMI (<25). Avoid tobacco in any form and if you are a smoker, stop smoking.
- Continue with **medications** for high blood pressure, diabetes, or dyslipidemia, if advised by your physician. Maintain HbA1c <7% (<53mmol/mol), blood pressure <140/90mmHg.
- Follow your physician's advice regarding follow up tests, consults and annual health assessment

DISCLAIMER

- 1. This is not a diagnostic tool and it does not guarantee accuracy of the result and cannot be acted upon independently.
- 2. This risk score and clinical algorithm is a general guideline for physicians. Any additional laboratory investigations, diagnostic imaging, treatment or patient education related to lifestyle management is under the physician 's or cardiologist's discretion.
- To ensure the information in the report is up to date, accurate and correct, doctor shall be consulted for interpretation of the report.
 Apollo Hospitals and its staff does not offer any assurance on the information made available or be liable for any loss or damage as the said
- report is based on the AICVD risk score without any intervention from their side .
 By usage of the AICVD risk score, it is deemed that the beneficiary of this service has agreed to get the same done at his own risk and further agrees with this disclaimer without any limitation or any clauses or sub-clauses.

Apollo Prediabetes Risk Tool

Low Risk

UHID : MHN1.0000127562

You are at low risk for developing prediabetes.

The Apollo Hospitals Prediabetes Risk tool is a comprehensive, community-based risk assessment tool for the early diagnosis of prediabetes (before estimation of blood glucose or HbA1C). This tool compiles data based on your physical parameters, lifestyle, and health attributes and assesses whether you have a low, medium or high risk for undiagnosed prediabetes. The tool has been developed based on Indian demographics and has more than 90% accuracy.

ADVICE

- · Follow the guidance and education on dietary and lifestyle management
- Aim for 30 minutes or more of moderately intense **exercise** (such as brisk walking) most days of the week, for a minimum of 150 minutes (2.5 hours) of total physical activity/week.
- You do not need to be referred to an **endocrinologist or diabetologist** at this time.
- Follow your **physician's guidance** regarding **annual follow-up testing**.

DISCLAIMER

- 1. This is not a diagnostic tool and it does not guarantee the accuracy of the result and cannot be independently acted upon.
- 2. This Risk score and Clinical Algorithm is a general guideline for physicians. Any additional laboratory investigations, diagnostic imaging, treatment or patient education related to lifestyle management is under the physician's or endocrinologist's discretion.
- 3. To ensure the information in the report is up to date, accurate and correct, doctor shall be consulted for interpretation of the report.
- 4. Apollo Hospitals and its staff does not offer any assurance on the information made available or be liable for any loss or damage as the said report is based on the Prediabetes Risk Score without any intervention from their side.
- 5. By usage of Prediabetes Risk Score, it is deemed that beneficiary of this service has agreed to get the same done at his own risk and further agrees with this disclaimer without any limitation or any clauses or sub-clauses.
- 6. The current model doesn't account for:
 - · Uncontrolled and Undiagnosed Diabetes
 - · Gestational Diabetes
 - Polycystic Ovarian Disease (PCOD)
 - · Diabetes currently being managed
