Sample ID :

Test Description	Value(s)	Reference Range	Unit
PSA (Prostate Specific Antigen)-Total			
PSA- Prostate Specific Antigen*	2.21	0 - 4	ng/mL

INTERPRETATION :

Prostate-specific antigen (PSA) is a glycoprotein that is produced by the prostate gland, the lining of the urethra, and the bulbourethral gland. PSA exists in serum mainly in two forms, complexed to alpha-1-anti-chymotrypsin (PSA-ACT complex) and unbound (free PSA). Increases in prostatic glandular size and tissue damage caused by benign prostatic hypertrophy, prostatitis, or prostate cancer may increase circulating PSA levels. Transient increase in PSA can also be seen following per rectal digital or sonological examinations.

Note: Patients on Biotin supplement may have interference in some immunoassays. With individuals taking high dose Biotin (more than 5 mg per day) supplements, at least 8-hour wait time before blood draw is recommended.

Sample ID :

Test Description	Value(s)	Reference Range	Unit
PSA (Prostate Specific Antigen)-Total			
PSA- Prostate Specific Antigen*	2.21	0 - 4	ng/mL

INTERPRETATION :

Prostate-specific antigen (PSA) is a glycoprotein that is produced by the prostate gland, the lining of the urethra, and the bulbourethral gland. PSA exists in serum mainly in two forms, complexed to alpha-1-anti-chymotrypsin (PSA-ACT complex) and unbound (free PSA). Increases in prostatic glandular size and tissue damage caused by benign prostatic hypertrophy, prostatitis, or prostate cancer may increase circulating PSA levels. Transient increase in PSA can also be seen following per rectal digital or sonological examinations.

Note: Patients on Biotin supplement may have interference in some immunoassays. With individuals taking high dose Biotin (more than 5 mg per day) supplements, at least 8-hour wait time before blood draw is recommended.

ULTRASONOGRAPHY OF ABDOMEN AND PELVIS

LIVER – It shows mild increased echotexture but normal size. No mass or focal lesions is seen.

Biliary and portal radicals appear normal. Length of right lobe of liver is 12.6cm. PV-9mm.

PANCREAS— It shows normal echotexture and size. No focal lesions are seen.

GALL BLADDER—It is moderately distended. No calculi are seen. GB wall thickness is 4mm.

Pericholecystic space appears normal. CBD is 3mm.

SPLEEN— It shows normal echotexture and size. Length of spleen is 9.6cm.

BOTH KIDNEYS show normal echotexture and size. Corticomedullary junction appears normal.

No hydronephrosis or calculus is seen in both the kidneys. Perirenal space is normal.

Right kidney--measures 10cm x 5.2cms .

Left kidney—measures 10.3cms x 4.9cms.

Urinary Bladder is well distended . No calculus or mass is seen .Wall thickness is 3mm .Both

VUJs are normal.

FV-282ml. PVR is 56ml .

Prostate measures 4.6cms x 4.4cm x 3cms Weight is 33gms.

No calcification or mass is seen.

No free fluid is seen in pelvis. Plenty of bowel gases are seen.

Impression : Mild fatty liver.

Prostatomegaly with PVR.
