Blood Group Report

Name of the Patient : AVINASH G DANDEKAR

Age : 30 Year Gender : Male

Patient Sample ID : JJ23-R03419

Hospital IP NO: 330476

Referred By Hospital : Wockhardt Super Speciality Hosp

Sample Received : EDTA / PLAIN

Date & Time of Sample Receiving : 30/Mar/2023 11:26 AM

Adequacy of Sample : Adequacy

Investigation Required : Blood Group

Date of Release of Report : 30/Mar/2023 11:57 AM

Report

Forward Red Cell Blood Group : B

Reverse Serum Blood Group : B

Rh Typing : Rh Positive

Final Blood Group: B Rh Positive

Opinion : If there is any Blood group discrepancy, it may be because of the irregular antibody present in the blood. This requires proper evaluation of Antibody Identification and Rh Phenotyping.

Remark :

Principle of the Test :

As the Matrix gel card containing red blood cells is centrifuged under specific conditions, the red blood cells sensitized with antibody will agglutinate in the presence of the Anti- Human Globulin reagent in the gel matrix and will be trapped in the gel column. The red blood cells, which do not react are not trapped in the gel matrix and are pelleted at the bottom of the column.

The reactions are then read and graded according to their reactivity pattern.
