DEPARTMENT OF RADIOLOGY

ULTRASOUND - WHOLE ABDOMEN

Liver appears normal in size . **Mild fatty liver.** No focal lesion is seen. PV and CBD normal. No dilatation of the intrahepatic biliary radicals.

Gall bladder is well distended. No evidence of calculus. Wall thickness appears normal. No evidence of periGB collection. No evidence of focal lesion is seen.

Spleen appears normal. No focal lesion seen. Splenic vein appears normal.

Pancreas appears normal in echopattern. No focal/mass lesion/calcification. No evidence of peripancreatic free fluid or collection. Pancreatic duct appears normal.

Both the kidneys appear normal in size, shape and echopattern. Cortical thickness and CM differentiation are maintained. No calculus / hydronephrosis seen on either side.

Urinary Bladder is well distended and appears normal.

Uterus appears normal in size. It shows normal shape & echo pattern. Endometrial echo-complex appears normal and measures 7 mm.

Both ovaries appear normal in size, shape and echotexture.

No evidence of any adnexal pathology noted.

IMPRESSION:-

Mild fatty liver.

Suggest – clinical correlation.

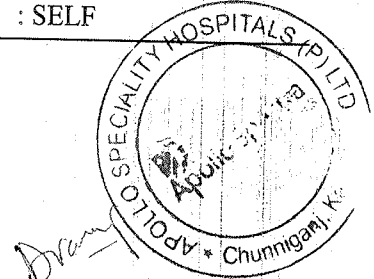

(The sonography findings should always be considered in correlation with the clinical and other investigation finding where applicable.) It is only a professional opinion, Not valid for medico legal purpose.

Test Description	Value(s)	Reference Range	Unit(s)
------------------	----------	-----------------	---------

Sample type : Serum

Prolactin (PRL) 16.9

Interpretation of results

	Phase	Unit(s)
In Males	-	3.6-22.6
In Females	Normal	4.4-32.6
	Postmenopausal	4.1-27.3

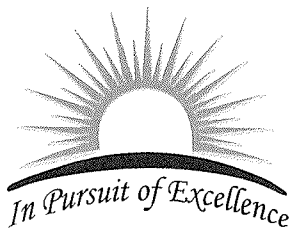

Excess serum prolactin could result in hyperprolactinaemia, which is associated with hypoeestrogenism, anovulatory infertility, oligomenorrhoea, amenorrhoea, unexpected lactation and loss of libido in women and erectile dysfunction and loss of libido in men. Serum prolactin deficiency could result in hypoprolactinemia, which is associated with ovarian dysfunction in women, and arteriogenic erectile dysfunction, premature ejaculation, oligozoospermia, asthenospermia, hypofunction of seminal vesicles and hypoandrogenism in men.
