Albumin (Serum/Bro		ocresol green)	3.9		gm/dl	3.5 - 5.2
Globulin (Serum/Ca		alated)	3.50)	gm/dL	2.3 - 3.6
A : G RA (Serum/ <i>Ca</i>			1.11			1.1 - 2.2
INTERPI	RE	TATION: Enclosure : Graph				
GGT(Ga (Serum/IF)		ma Glutamyl Transpeptidase) //Kinetic)	17		U/L	< 38
<u>Lipid Pr</u>	ofi	<u>le</u>				
Choleste (Serum/Ch		l Total esterol oxidase/Peroxidase)	149		mg/dL	Optimal: < 200 Borderline: 200 - 239 High Risk: >= 240
Triglycen (Serum/Gl		es rol-phosphate oxidase/Peroxidase)	99		mg/dL	Optimal: < 150 Borderline: 150 - 199 High: 200 - 499 Very High: >= 500

INTERPRETATION: The reference ranges are based on fasting condition. Triglyceride levels change drastically in response to food, increasing as much as 5 to 10 times the fasting levels, just a few hours after eating. Fasting triglyceride levels show considerable diurnal variation too. There is evidence recommending triglycerides estimation in non-fasting condition for evaluating the risk of heart disease and screening for metabolic syndrome, as non-fasting sample is more representative of the õusualö"circulating level of triglycerides during most part of the day.
