**INTERPRETATION:**

- \* Blood sample can be drawn at any time. Fasting is not required.
- \* Reflects average blood sugar levels for the 2 to 3 months period before the test.
- \* Provides information for evaluating diabetic treatment modalities and tracks control of blood glucose of particular value in diabetic children, diabetics in whom the renal threshold for glucose is abnormal, unstable insulin dependent diabetics where blood sugars vary markedly from day to day.
- \* High value in poorly controlled DM and moves towards normal in patients with optimal control.
