

Mediwheel Corporate API

1. **Authentication** – For the authentication, must be pass authorization token with the request in the header. The authorization token is created by below formula-
`Authentication token = Base64encode(client_id:secret_id)`
Here client_id and secret_id provide by Mediwheel.
2. **Add New Employee With Dependent** - The api will be use to create new employee with their dependents on the Mediwheel portal

(a) Request type – POST

(b) Request Url - <https://mediwheel.in/api/add-corporate-user>
