Hb A1c 5.5 %

EXPECTED VALUES :-

Metabolically healthy patients	=	4.8 - 5.5 % HbA1c
Good Control	=	5.5 - 6.8 % HbA1c
Fair Control	=	6.8 - 8.2 % HbA1c
Poor Control	=	>8.2 % HbA1c

REMARKS:-

In vitro quantitative determination of **HbA1c** in whole blood is utilized in long term monitoring of glycemia. The **HbA1c** level correlates with the mean glucose concentration prevailing in the course of the patient's recent history (approx - 6-8 weeks) and therefore provides much more reliable information for glycemia

RESULT : Non Reactive

COMMENTS :-

Hepatitis C Virus (HCV) has been identified as the main etiological agent of Non A- Non B hepatitis accounting for 80-90 cases of transfusion hepatitis cases. HCV is transmitted primarily through parenteral routes.

RESULT :-

HIV I : Non Reactive

HIV II : Non Reactive

COMMENTS :-

HIV Elisa is a screening procedure. Positive specimens should be retested using another method before diagnosis.

INTERPRETATION :
Expected Values :

Age (years)	PSA concentrations (ng / mL)	
	Low Limit	High Limit
< 40	0.21	1.72
40 - 49	0.27	2.19
50 - 59	0.27	3.42
60 - 69	0.22	6.16
> 69	0.21	6.77

PSA is reliable tumour marker for already diagnosed prostatic carcinomas. It is uniquely associated only with prostatic tissue, and therefore is specific for it. Baseline levels measured prior to therapeutic intervention and followed later by serial periodical measurements will predict the outcome of therapy. It also helps in early discovery of recurrences, relapses and metastases.

In general, tumor marker levels are directly proportional to the tumour mass and the stage of the cancer. However, it is the rate of change of the tumor marker level which is more important, rather than its absolute value.

A 50% change may be considered clinically significant. It must be emphasised that PSA may also be elevated in benign prostatic hypertrophy and inflammatory conditions of the surrounding genitourinary tract. Therefore, this parameter should never be used as a screening test for diagnosing prostatic carcinomas but only as an aid in follow up studies.
