*Performed On: ACCESS 2 (BECKMAN COULTER)*

- A circadian variation in serum TSH in healthy subjects is well documented. TSH level is reaching peak levels between 2-4 am and at a minimum between 6-10 pm. The variation is of the order of 50%, hence time of the day has influence on the value of TSH.
- TSH levels between 6.3 and 15.0 may represent subclinical or compensated hypothyroidism or show considerable physiological & seasonal variation, suggest clinical correlation or repeat testing with fresh sample.
- TSH levels may be transiently altered because of non-thyroid illness, like severe infection, renal disease, liver disease, heart disease, severe burns, trauma, surgery etc. Few drugs also altered the TSH values.
- A high TSH result often means an underactive thyroid gland caused by failure of the gland (hypothyroidism). A low TSH result can indicate an overactive thyroid gland (hyperthyroidism) or damage to the pituitary gland that prevents it from producing TSH.
- Resistance to thyroid hormone (RTH) and central hyperthyroidism (TSH-oma) are rare conditions associated with elevated TSH, T4 and T3 levels.

### TREADMILL TEST (TMT)

REASON FOR EXAMINATION: Routine

#### FINDINGS:

The patient was exercised according to standard Bruce protocol for 01.21 minutes achieving maximal heart rate of 167 resulting in 94% of age-predicted maximal heart rate (177). Peak blood pressure was 130/80. The patient did not experience any chest discomfort during stress or recovery. The test was terminated due to leg fatigue and achieving target heart rate. Electrocardiogram during stress and recovery did not reveal an additional 1 mm of ST depression compared to the baseline electrocardiogram.

#### IMPRESSION:

1. Normal response to induced stress.
2. Adequate heart rate and blood pressure response.
3. This maximal treadmill test did not evoke significant and diagnostic clinical or electrocardiographic evidence for significant occlusive coronary artery disease.

CONCLUSION: TMT IS NEGATIVE FOR REVERSIBLE INDUCIBLE MYOCARDIAL ISCHEMIA.

ADVICE : CLINICAL CORRELATION.
