## SONOGRAPHY USG WHOLE ABDOMEN

- \* LIVER :Normal in size ( 14.05 cm), **shows diffuse fine increased echogenicity of parenchyma with no evidence of any focal lesion seen.** IHBRs are not dilated.
  - \*PORTO CAVAL SYSTEM: Hepatic veins and IVC appear normal and show normal respiratory variation. Splenic vein is normal.Portal vein is normal.
  - \*COLLECTING DUCT & CBD:Normal in size and have echo lucent lumen.
  - \*GALL BLADDER :Seen in distended state with normal wall and lumen is echofree
  - \*SPLEEN:Normal in size, shape & echo texture. No focal lesions seen.
  - \*PANCREAS:Pancreatic head, body & tail visualized and have ,normal size,shape & echo texture.
  - \*KIDNEYS: Both kidneys are of normal shape, size and position.  
Cortical thickness is normal .CMD is maintained. There is no evidence of hydronephrosis or calculus
  - \*URINARY BLADDER : Seen in distended state and has normal wall architecture.Lumen is echo free.
  - \*UTERUS: **Post Menopausal in status.**
  - \*BOTH OVARIES: **Bilateral Ovaries Could not be visualized Distinctly - ? Atrophic**
- No free fluid is seen in the peritoneal cavity.  
There is no evidence of any retroperitoneal lymphadenopathy/mass.

### FINAL IMPRESSION :

- **Fatty Liver ( Grade I)**

- Please correlate clinically , followup USG is recommended.

## X-RAY X-RAY CHEST PA. VIEW

- Positional rotation noted towards Left side
- Bilateral lung fields reveal mild accentuation of bronchovascular markings.
- Cardiothoracic ratio is within normal limits.
- Bilateral C.P. angles are clear.
- Bony cage and soft tissue normal.

- Please correlate clinically , Followup radiograph is recommended.

## DEPARTMENT OF PATHOLOGY

### T3, T4 TSH

PARAMETER	VALUE	RESULT	REFERENCE RANGE
T3 (TRIIODOTHYRONINE)	1.34 ng/ml	Normal	0.69 - 2.15
T4 (THYROXINE)	95.36 ng/ml	Normal	52 - 127
TSH (THYROID STIMULATING HORMONE)	1.42 uIU/ml	Normal	0.3 - 4.5

REFERENCE GROUP REFERENCE RANGE in uIU/mL  
As per American Thyroid Association

Adult Females (> 20 years)	0.30- 4.5
Pregnancy	
1st Trimester	0.10- 2.50
2nd Trimester	0.20 - 3.00
3rd Trimester	0.30 - 3.00

#### Note:

TSH levels are subject to circadian variation, reaching peak levels between 2 - 4.a.m. and at a minimum between 6-10 pm . The variation is of the order of 50% . hence time of the day has influence on the measured serum TSH concentrations.

1. Recommended test for T3 and T4 is unbound fraction or free levels as it is metabolically active.
1. Physiological rise in Total T3 / T4 levels is seen in pregnancy and in patients on steroid therapy.

#### Clinical Use

- Primary Hypothyroidism
- Hyperthyroidism
- Hypothalamic - Pituitary hypothyroidism
- Inappropriate TSH secretion
- Nonthyroidal illness
- Autoimmune thyroid disease
- Pregnancy associated thyroid disorders
- Thyroid dysfunction in infancy and early childhood

## DEPARTMENT OF PATHOLOGY

### HBA1c (GLYCOSYLATED HAEMOGLOBIN)

PARAMETER	VALUE	RESULT	REFERENCE RANGE
HBA1 C (GLYCOSYLATED HEAMOGLOBIN)	5.5 %	Normal	4 - 6

#### Interpretation

As per American diabetes Association (ADA)

Reference Group - HbA1c In%  
Non diabetic >= 18 years - 4.0 - 6.0  
At risk (Prediabetes) - >= 6.0 to < = 6.5  
Diagnosing diabetes - >=6.5

#### Therapeutic goals for glycemc control

- Age > 19 years
- Goal of therapy: <7.0
- Action suggested: >8.0
- Age < 19 years
- goal of therapy: < 7.5

#### Note:

1. Since HbA1c reflects long term fluctuations in the blood glucose concentration, a diabetic patient is recently under good control may still have a high concentration of HbA1c. converse is true for a diabetic previously under good control now poorly controlled.

2. Target goals of <7.0 % may be beneficial in patient with short duration of diabetes, long life expectancy and no significant cardiovascular disease. In patient with significant complication of diabetes, limited life expectancy of extensive co-morbid condition, targeting a goal of <7.0% may not be appropriate.

#### Comments

HbA1c provides an index of average blood glucose levels over the past 8-12 weeks and is a much better indicator of long glycemc control as compared to blood and urinary glucose determination.
