Note :

- The HbA1c test is used to monitor long term glucose control in patients with diabetes. It provides a retrospective index of the integrated plasma glucose values over an extended period 12 weeks of time and is not subject to the wide fluctuations observed when assaying blood glucose concentrations. It is a measure of the risk for the development of complications in diabetes mellitus.
- Patients with hemolytic disease or other conditions with shortened red blood cell survival exhibit a substantial reduction in HbA1c.

ENDOCRINOLOGY

TFT (THYROID FUNCTION TEST)

T3-Total (Tri Iodothyronine)	: 1.10	ng/mL	0.80 - 2.00
T4 - Total (Thyroxin)	: 10.20	µg/dL	5.1 - 14.1
Thyroid Stimulating Hormones (Ultra TSH)	: 3.13	µIU/mL	0.27 - 4.20

Method -> serum by ECLIA

NOTE:-

Three common ways in which there may be inadequate amounts of the thyroid hormone for normal metabolism. Primary hypothyroidism, in which there is a raised TSH & a low T3. This is due to failure of the thyroid gland, possibly due to autoantibody disease, possibly due to toxic stress or possibly due to iodine deficiency. The second, the most common cause of thyroid failure, occurs at the pituitary level. In this condition there is inadequate thyroid stimulating hormone (TSH) produced from the pituitary and so one tends to see low or normal TSH, low T4s and variable T3s. This condition is most common in many patients with chronic fatigue syndrome, where there is a general suppression of the hypothalamic-pituitary-adrenal axis. The third type of under-functioning is due to poor conversion of there are normal or possibly slightly raised levels of TSH, normal levels of T4 but low levels of thyroid problem routinely TSH, a Free T4 and a Free T3 are also advisable. Any patients who are taking T3 as part of their thyroid supplement need have their T3 levels monitored as well as T4. T3 is much more quickly metabolized than T4 and blood tests should be done between 4-6 hours after their morning dose.

The Guideline for pregnancy reference ranges for total T3, T4, Ultra TSH Level in pregnancy

	Total T3	Total T4	Ultra TSH
First Trimester	0.86 - 1.87	6.60 - 12.4	0.30 - 4.50
2nd Trimester	1.0 - 2.60	6.60 - 15.5	0.50 - 4.60
3rd Trimester	1.0 - 2.60	6.60 - 15.5	0.80 - 5.20

The guidelines for age related reference ranges for T3, T4 & Ultra TSH

	Total T3	Total T4	Ultra TSH
Cord Blood	0.30 - 0.70	1-3 day 6.2-19.9	Birth- 4 day: 1.0-38.9
