

LETTER OF APPROVAL / RECOMMENDATION

To,

The Coordinator, Mediwheel (Arcofemi Healthcare Limited) Helpline number: 011- 41195959

Dear Sir / Madam,

Sub: Annual Health Checkup for the employees of Bank of Baroda

This is to inform you that the following employee wishes to avail the facility of Cashless Annual Health Checkup provided by you in terms of our agreement.

PARTICULARS	EMPLOYEE DETAILS
NAME	MR. DALVI NIVRUTI PANDURANG
EC NO.	164694
DESIGNATION	SINGLE WINDOW OPERATOR A
PLACE OF WORK	MAPUCA RESIDENCY
BIRTHDATE	15-12-1989
PROPOSED DATE OF HEALTH CHECKUP	31-03-2023
BOOKING REFERENCE NO.	22M164694100056340E

This letter of approval / recommendation is valid if submitted along with copy of the Bank of Baroda employee id card. This approval is valid from 31-03-2023 till 31-03-2023 The list of medical tests to be conducted is provided in the annexure to this letter. Please note that the said health checkup is a cashless facility as per our tie up arrangement. We request you to attend to the health checkup requirement of our employee and accord your top priority and best resources in this regard. The EC Number and the booking reference number as given in the above table shall be mentioned in the invoice, invariably.

We solicit your co-operation in this regard.

Yours faithfully,

Sd/-

Chief General Manager HRM Department Bank of Baroda

THYROID FUNCTION TEST

PARAMETER

RESULTS

BIOLOGICAL REF RANGE

METHOD

Total T3, Serum

1.9

1.3-3.1 nmol/l

ECLIA

NOTE: The unbound fraction of total T3 concentrations, free triiodothyronine (FT3) is metabolically active hence, more than measuring total T3 as altered levels of total T3 occur due to changes in T3 binding proteins, especially TBG as in canormal pregnancy and steroid therapy.

Total T4, Serum

106.2

66-181 nmol/l

ECLIA

NOT: T4 circulates in the blood as an equilibrium mixture of free and protein bound hormone. FT4 is a better indicator thyroid hormone action than Total T4 because it is not affected by changes in Thyroxine Binding Globulin (TBG) or other Thyroxine Binding Proteins like in illness, drug intake or pregnancy.

sensitiveTSH, Serum

2.49

0.35-5.5 microlU/ml

ECLIA

Collected

: 14-Apr-2023 / 16:1

Reported : 14-Apr-2023 / 18:0

Interpretation:

A thyroid panel is used to evaluate thyroid function and/or help diagnose various thyroid disorders.

Clinical Significance:

1)TSH Values between high abnormal upto 15 microIU/ml should be correlated clinically or repeat the test with new sample as physiologic factors

can give falsely high TSH.

2)TSH values may be trasiently altered becuase of non thyroidal illness like severe infections, liver disease, renal and heart severe burns, trauma and surgery etc.

uaum	ia anu surgery	CIU.			
TSH	FT4/T4	FT3/T3	Interpretation		
High	Normal	Normal,	Subclinical hypothyroidism, poor compliance with thyroxine, drugs like amiodarone, Recovery phase of thyroidal illness, TSH Resistance.		
High	Low	Low	Hypothyroidism, Autoimmune thyroiditis, post radio iodine Rx, post thyroidectomy, Anti thyroid drugs, kinase inhibitors & amiodarone, amyloid deposits in thyroid, thyroid tumors & congenital hypothyroidism		
Low	High	High	Hyperthyroidism, Graves disease, toxic multinodular goiter, toxic adenoma, excess iodine or thyroxine pregnancy related (hyperemesis gravidarum, hydatiform mole)		
Low	Normal	Normal	Subclinical Hyperthyroidism, recent Rx for Hyperthyroidism, drugs like steroids & dopamine), Non thyrillness.		
Low	Low	Low	Central Hypothyroidism, Nor: Thyroidal illness, Recent Rx for Hyperthyroidism.		
High	High	High	Interfering anti TPO antibodies, Drug interference: Arniodarone, Heparin, Beta Blockers, steroids & an epileptics.		

Diurnal Variation:TSH follows a diurnal rhythm and is at maximum between 2 am and 4 am, and is at a minimum between 6 pm and 10 p. The variation is on the order of 50 to 206%. Biological variation:19.7%(with in subject variation)

Reflex Tests: Anti thyroid Antibodies, USG Thyroid , TSH receptor Antibody. Thyroglobulin, Calcitonin

Limitations:

1. Samples should not be taken from patients receiving therapy with high biotin doses (i.e. >5 mg/day) until atleast 8 hours following the last biotin administration.

2. Patient samples may contain heterophilic antibodies that could react in immunoassays to give falsely elevated or depressed results. this assay is designed to minimize interference from heterophilic antibodies.

NAME: NIVRUTI PANDURANG DALVI

HEALTH CHECK UP DATE: 14/04/2023

ABDOMINO-PELVIC ULTRASONOGRAPHY

Real time USG of the abdomen and pelvis was performed.

The LIVER - normal .

The GALL BLADDER - normal

PANCREAS-grossly normal

SPLEEN - normal .

Both kidneys are normal in size, position and contour RIGHT KIDNEY- no calculus or hydronephrosis LEFT KIDNEY- no calculus or hydronephrosis.

The URINARY BLADDER - not adequately full, grossly normal

The **PROSTATE** is normal in size . volume- 12 cc There is no free fluid in the abdomen or pelvis.

OPINION: No significant abnormality was seen in this study

With warm regards.
