IMMUNOLOGY

| Test Name | Value | Status | Unit | Biological Ref Interval |
|-----------|-------|--------|------------|-------------------------|
| T3 | 0.89 | | ng/ml | 0.87 - 1.78 |
| T4 | 7.12 | | ug/dl | 4.82 - 15.65 |
| TSH | 2.888 | | micro U/ml | 0.340 - 5.600 |

TSH levels may be affected by acute illness and drugs like dopamine and gluco corticoids.

Low or undetectable TSH is suggestive of Grave's disease

TSH between 5.5 to 15.0 with normal T3,T4 indicates impaired thyroid hormone or subclinical hypothyroidism or normal T3,T4 with slightly low TSH suggests subclinical hyperthyroidism

TSH suppression does not reflect severity of hyperthyroidism therefore, measurement of FT3,FT4 is important.

Free T3 is first hormone to increase in early hyperthyroidism.
Only TSH level can prove to be misleading in patients on treatment.

Therefore Free T3, Free T4 along with TSH should be checked.
During pregnancy clinically T3T4 can be high and TSH can be slightly low.

Cytopathology Report

Specimen :

Pap smear for cytology (conventional)

Clinical Data :

NA

Macroscopic Examination :

Received 1 unstained smears.

Microscopic Examination :

See below in diagnosis

Impression :

The Bethesda System (TBS 2014) (Conventional Pap)

Specimen type: Conventional Pap smear.

Specimen adequacy: Satisfactory for evaluation with partially obscuring inflammation

Transformation zone elements: Not present

Infection associated changes: Trichomonas or Monilia are not seen.

Reactive cellular changes: Present, mild inflammation related.

Epithelial cell abnormality: Nil

Other cells: Nil

Interpretation/result: Negative for intraepithelial lesion or malignancy.

Pap test is a screening test for cervical cancer with inherent false negative results.

----- End Of Report -----

Grossing By :

For test performed on specimens received or collected from non-NSRL locations, it is presumed that the specimen belongs to the patient named or identified as labeled on the container/test request and such verification has been carried out at the point generation of the said specimen by the sender. NSRL will be responsible Only for the analytical part of test carried out. All other responsibility will be of referring Laboratory.
