ULTRASOUND

Liver is enlarged (17.2cm) and shows grade II fatty changes. There is no focal hepatic lesion present. Portal vein and CBD are normal in course and caliber.

Gallbladder is partially distended and shows normal intraluminal echotexture. There is normal wall thickness.

Pancreas is normal in size, contour & echo pattern The pancreatic duct is not dilated. Pancreatic contour is regular & peri pancreatic planes are maintained.

Spleen is normal in size & echo pattern.

Both kidneys are normal in shape size contour & echo pattern. There is no hydronephrosis defined on either side. Both ureters are obscured by bowel gas.

Bladder is partially distended. Note is made of atrophic uterus. Bilateral adnexa is unremarkable.
Prostate is normal in morphology and echotexture.

There is no free fluid present in the abdomen

Impression:

Imaging features are suggestive of -
Hepatomegaly with grade II fatty changes.
