COMPLETE BOOD COUNT

Test	Result	Unit	Biological Ref. Interval
HB and Indices			
Hemoglobin	14.3	g/dL	13.0 - 16.5
RBC Count	4.80	million/cmm	4.5 - 5.5
Hematocrit	42.7	%	40 - 49
MCV	89.0	fL	83 - 101
MCH	29.8	pg	27.1 - 32.5
MCHC	33.5	g/dL	32.5 - 36.7
RDW CV	12.90	%	11.6 - 14
Total WBC and Differential Count			
WBC Count	7190	/cmm	4000 - 10000
Differential Count			
Neutrophils	51.1	% 40 - 80	3674 /cmm 2000 - 6700
Lymphocytes	39.9	% 20 - 40	2869 /cmm 1000 - 3000
Eosinophils	0.7	% 1 - 6	50 /cmm 20 - 500
Monocytes	7.9	% 2 - 10	568 /cmm 200 - 1000
Basophils	0.4	% 0 - 2	29 /cmm 0 - 100
Platelet Count			
Platelet Count	281000	/cmm	150000 - 410000
Erythrocytes Sedimentation Rate			
ESR	04	mm/1hr	0 - 14

HbA1c (Glycosylated Hemoglobin)

Test	Result	Unit	Biological Ref. Interval
HbA1c	H 6.83	%	For Screening: Diabetes: >6.5% Pre-Diabetes: 5.7% - 6.4% Non-Diabetes: < 5.7% For Diabetic Patient: Poor Control : > 7.0 % Good Control : 6.0-7.0 %
Mean Blood Glucose <small>Calculated</small>	149.32	mg/dL	

Explanation:-

- Total haemoglobin A1 c is continuously synthesized in the red blood cell through its 120 days life span. The concentration of HBA1c in the cell reflects the average blood glucose concentration it encounters.
- The level of HBA1c increases proportionately in patients with uncontrolled diabetes. It reflects the average blood glucose concentration over an extended time period and remains unaffected by short-term fluctuations in blood glucose levels.
- The measurement of HbA1c can serve as a convenient test for evaluating the adequacy of diabetic control and in preventing various diabetic complications. Because the average half life of a red blood cell is sixty days, HbA1c has been accepted as a measurement which reflects the mean daily blood glucose concentration, better than fasting blood glucose determination, and the degree of carbohydrate imbalance over the preceding two months.
- It may also provide a better index of control of the diabetic patient without resorting to glucose loading procedures.

HbA1c assay Interferences:

Erroneous values might be obtained from samples with abnormally elevated quantities of other Haemoglobins as a result of either their simultaneous elution with HbA1c (HbF) or differences in their glycation from that of HbA (HbS).

Thyroid Function Test

Test	Result	Unit	Biological Ref. Interval
T3 - Triiodothyronine <small>CMIA</small>	1.27	ng/mL	0.58 - 1.59
T4 - Thyroxine <small>CMIA</small>	7.66	micro g/dL	5.13 - 14.06
TSH - Thyroid Stimulating Hormone <small>CMIA</small>	1.1000	microIU/mL	0.35 - 4.94

TSH	T3/FT3	T4/FT4	Suggested Interpretation for the Thyroid Function Tests Pattern
Within Range	Decreased	Within Range	- Isolated Low T3-offen seen in elderly & associated Non-Thyroidal illness. In elderly the drop in T3 level can be upto 25%
Raised	Within Range	Within Range	- Isolated High TSH especially in the range of 4.7 to 15 mIU/ml is commonly associated with physiological & Biological TSH Variability. - Subclinical Autoimmune Hypothyroidism - Intermittent T4 therapy for hypothyroidism - Recovery phase after Non-Thyroidal illness
Raised	Decreased	Decreased	- Chronic autoimmune Thyroiditis - Post thyroidectomy, Post radiiodine - Hypothyroid phase of transient thyroiditis
Raised or Within Range	Raised	Raised or Within range	- Interfering antibodies to thyroid hormones (anti-TPO antibodies) - intermittent T4 therapy or T4 overdose - Drug interference-Amiodarone, Heparin, Beta blockers, steroids, anti-epileptics
Decreased	Raised or within Range	Raised or within Range	- Isolated Low TSH - especially in the range of 0.1 to 0.4 often seen in elderly & associated with Non-Thyroidal illness - Subclinical Hyperthyroidism - Thyroxine ingestion
Decreased	Decreased	Decreased	- Central Hypothyroidism - Non-Thyroidal illness - Recent treatment for Hyperthyroidism (TSH remains suppressed)
Decreased	Raised	Raised	- Primary Hyperthyroidism (Graves disease), Multinodular goitre Toxic nodule - Transient thyroiditis:Postpartum, Silent (lymphocytic), Postviral (granulomatous, subacute, DeQuervain'a) Gestational thyrotoxicosis with hyperemesis gravidarum
Decreased or within range	Raised	Within Range	- T3 toxicosis - Non-Thyroidal illness
