**Comments :**

Sector echo done in plax, psax, apical 4 & 5 chambers, subcostal view shows:

Normal morphology of aortic, mitral, tricuspid and pulmonary valves.

The left atrium, left ventricle, right atrium and right ventricle are normal in dimension and morphology. There is no regional wall motion abnormality of left ventricle at rest. The left ventricular systolic function is **good**. The global left ventricular ejection fraction is 65 %.

The IAS and IVS are intact.

The pericardium is normal. There is no pericardial effusion.

There is no clot or vegetation seen.

**CW, PW and Colour Doppler:** Transmitral flow is suggestive of normal left ventricular diastolic function present. There is trivial tricuspid regurgitation. There is no evidence of pulmonary hypertension.

**Impression:**

Normal cardiac valves and chamber dimensions

No regional wall motion abnormality of left ventricle at rest

Good left ventricular systolic function. LVEF – 65 %

Normal LV diastolic function present.

No pulmonary hypertension
