Executive Summary

1. Overweight (BMI - 29.76).

- 2. Serum uric acid level slightly raised (Uric Acid 7.4 mg/dL).
- 3. Mild Dyslipidaemia.
- 4. USG W/A Grade I fatty liver.

Wellness Prescription

Advice On Diet :-

* Low calorie, low fat, low purine healthy balanced diet.

* Drink plenty of fluids.

Advice On Physical Activity :-

* Regular exercise and maintain ideal weight.

Other Lifestyle Changes & Recommendations :-

* Advised to lose weight.

Medications

* Cap. NATVIE 400IU (VITAMIN E) 1 capsule once daily after dinner for 3 months.

Recommended Follow-up Tests

Test Name	Test	Schedule	Repeat Frequency	Remarks	
LIPID PROFILE TEST (PACKAGE)	6 N	Month(s)		review with report	
URIC ACID - SERUM	6 1	Month(s)		review with report	

Follow-up and Review Plan

* Annual health check-up.

in AskApollo App to book your follow-up appointments and investigations

AICVD RISK SCORE REPORT						
RISK STATUS	YOUR SCORE	ACCEPTABLE SCORE				
Low Risk	3	3				

Your cardiovascular disease risk in the next 10 years is within the Normal limits for your age and gender

The AICVD risk score developed by Apollo Hospitals is a novel artificial intelligence -based risk scoring system that predicts your risk of having Coronary Artery Disease (CAD) related events in the next ten years. This scoring system uses Indian data and has been validated by multiple national and international institutions. This risk score is more than 92% accurate and has been compiled based on your physical parameters, heart health attributes, lifestyle and medical history. **Note:** The risk category is determined through the ratio between guest score and acceptable score at multiple decimal points. The outputs are shown in whole numbers.

Based on your AICVD risk score you are advised the following:

- Follow the guidance and education on lifestyle and dietary management provided through the ProHealth program. Maintain a healthy BMI (<25). Avoid tobacco in any form and if you are a smoker, stop smoking.
- Continue with **medications** for high blood pressure, diabetes, or dyslipidemia, if advised by your physician. Maintain HbA1c <7% (<53mmol/mol), blood pressure <140/90mmHg.
- Follow your physician's advice regarding follow up tests, consults and annual health assessment

DISCLAIMER

Name

- 1. This is not a diagnostic tool and it does not guarantee accuracy of the result and cannot be acted upon independently.
- 2. This risk score and clinical algorithm is a general guideline for physicians. Any additional laboratory investigations, diagnostic imaging, treatment or patient education related to lifestyle management is under the physician 's or cardiologist's discretion.
