HbA1c

TEST NAME	RESULT	UNIT	BIO. REF. RANGE	METHOD
HBA1C, GLYCATHEAMOGLOBIN,	5.4	%		TURBIDIMETRIC
<i>WHOLE BLOOD EDTA</i>				

Comment:

Reference range as per American Diabetes Association (ADA):

REFERENCE GROUP	HBA1C IN %
NON DIABETIC ADULTS > 18 YEARS	<5.7
AT RISK (PREDIABETES)	5.7-6.4
DIAGNOSING DIABETES	≥6.5
DIABETICS	
EXCELENT CONTROL	6-7
FAIR TO GOOD CONTROL	7-8
UNSATISFACTORY CONTROL	8-10
POOR CONTROL	>10

Note: Dietary preparation or fasting is not required.

1. A1C test should be performed at least two times a year in patients who are meeting treatment goals (and who have stable glycemic control).
2. Lowering A1C to below or around 7% has been shown to reduce microvascular and neuropathic complications of type 1 and type 2 diabetes. When mean annual HbA1c is <1.1 times ULN (upper limit of normal), renal and retinal complications are rare, but complications occur in >70% of cases when HbA1c is >1.7 times ULN.
3. Falsely low HbA1c (below 4%) may be observed in patients with clinical conditions that shorten erythrocyte life span or decrease mean erythrocyte age. HbA1c may not accurately reflect glycemic control when clinical conditions that affect erythrocyte survival are present. Fructosamine may be used as an alternate measurement of glycemic control.

ULTRASOUND WHOLE ABDOMEN

- **LIVER:** Liver is normal in size (14.3 cms) with normal shape & **increased echogenicity**. Biliary radicals are not dilated. No obvious focal lesion. Portal & hepatic veins are normal in caliber. Periportal region appears normal.
- **GALL BLADDER:** is partially distended. Wall thickness is normal. No pericholecystic fluid collection noted. CBD is not dilated.
- **PANCREAS:** is normal in size and contour. Parenchyma shows normal echotexture. No pancreatic duct dilatation is seen. No peri-pancreatic fluid collection seen.
- **SPLEEN:** is normal in size (11.0 cms), shape & position. Parenchyma shows normal echotexture. Splenic veins are not dilated.
- **B/L KIDNEYS:**
 - Both kidneys are normal in size, site, shape, position. Cortical echoes are normal. Cortico-medullary differentiation is maintained. Pelvicalyceal system are not dilated. No obvious calculus / mass / cyst seen.
- **URINARY BLADDER:** is well distended with normal contour. Wall appears regular. No evidence of any calculus /mass lesion is seen.
- **PROSTATE:** appears normal in size measuring 37x27x26 mm and weighing 14.3 gms. Parenchyma shows normal echotexture. No focal lesion / prostatic calcification seen.
- No evidence of free fluid.

IMPRESSION:

➤ **GRADE II FATTY LIVER.**
