Biochemistry**APOLLO - ARCOFEMI - MEDIWHEEL - FULL BODY HEALTH ANNUAL PLUS CHECK - FEMALE - 2D ECHO - PAN INI**

Test Name	Value	Unit	Biological Ref Range
 GLYCOSYLATED HAEMOGLOBIN	5.3	%	Normal : <5.7 % Prediabetic: 5.7% to 6.4% Diabetic : 6.5% or Higher
Method-HPLC			
Estimated Average Glucose	105.4	mg/dL	

Interpretation & Remark:

- HbA1c is used for monitoring diabetic control. It reflects the estimated average glucose (eAG).
- HbA1c has been endorsed by clinical groups & ADA (American Diabetes Association) guidelines 2017, for diagnosis of diabetes using a cut-off point of 6.5%.
- Trends in HbA1c are a better indicator of diabetic control than a solitary test.
- Low glycated haemoglobin (below 4%) in a non-diabetic individual are often associated with systemic inflammatory diseases, chronic anaemia (especially severe iron deficiency & haemolytic), chronic renal failure and liver diseases. Clinical correlation suggested.
- To estimate the eAG from the HbA1C value, the following equation is used: $eAG(mg/dl) = 28.7 * A1c - 46.7$
- Interference of Haemoglobinopathies in HbA1c estimation.
 - For HbF > 25%, an alternate platform (Fructosamine) is recommended for testing of HbA1c.
 - Homozygous hemoglobinopathy is detected, fructosamine is recommended for monitoring diabetic status
 - Heterozygous state detected (D10/ Tosho G8 is corrected for HbS and HbC trait).
- In known diabetic patients, following values can be considered as a tool for monitoring the glycemic control.

Excellent Control - 6 to 7 %,
Fair to Good Control - 7 to 8 %,
Unsatisfactory Control - 8 to 10 %

Test Name	Value	Unit	Biological Ref Range
ESR Westergren Method	70	mm/hr	0 - 20

1) It indicates presence and intensity of an inflammatory process, never diagnostic of a specific disease. Changes are more significant than a single abnormal test..

2) It is a prognostic test and used to monitor the course or response to treatment of disease like tuberculosis, bacterial endocarditis, acute rheumatic fever, rheumatoid arthritis, SLE, Hodgkins disease, temporal arteritis, polymyalgia rheumatica..

3) It is also increased in pregnancy, multiple myeloma, menstruation, and hypothyroidism.

Biochemistry**APOLLO - ARCOFEMI - MEDIWHEEL - FULL BODY HEALTH ANNUAL PLUS CHECK - FEMALE - 2D ECHO - PAN INI**

Test Name	Value	Unit	Biological Ref Range
 Uric Acid, Serum Method- Uricase - Trinder End Point	5.96	mg/dL	2.6 - 6.0
Calcium, Serum Method-Arsenazo-III End Point INTERPRETATION: Decreased total calcium levels can be associated with diseases of the bone apparatus (especially osteoporosis), kidney diseases (especially under dialysis), defective intestinal absorption and hypoparathyroidism. Increased total calcium can be measured in hyperparathyroidism, malignant diseases with metastases and sarcoidosis. Calcium measurements also help in monitoring of calcium supplementation mainly in the prevention of osteoporosis.	10.29	mg/dL	8.6 - 10.3
CREATININE, SERUM Serum, Enzymatic INTERPRETATION: The concentration of creatinine in plasma of a healthy individual is fairly constant, independent from water intake, exercise and rate of urine production. Therefore, increased plasma creatinine values always indicate decreased excretion, i.e. impaired kidney function.	1.08	mg/dL	0.6-1.1

Greetings from Apollo!

Respected Sir/Madam,

Please find corporate HC appointment details scheduled for 25-03-2023 at your NDC - Kalyan - AHCN Center.

Points to note :-

- Collect photocopy of employee ID proof if health check is through an employer
- Collect photocopy of personal ID proof if health check is for insurance
- Collect MER as per package details & that company's format (already shared)
- By 12 noon of appointment date, share Work order number & visit status (Show/No show)
- Upload reports in Adbhutam portal as per specifications given earlier

IMPORTANT INSTRUCTIONS

- Test results released pertain to specimen submitted.
- All test results are dependent on the quality of sample received by the Laboratory.
- Laboratory investigation are only a tool to facilitate in arriving at diagnostic and should be clinically correlated by the Referring Physician.
- Sample repeats are accepted on request of Referring Physician within 7 days post reporting.
- Report delivery may be delayed due to unforeseen circumstances. Inconvenience is regretted.
- Certain test may require further testing at additional cost for derivation of exact value. Kindly submit request within 72 hours post reporting.
- Test results may show interlaboratory variations.
- Test results are not valid for medico legal purposes.

TEST REPORT

NAME: MRS.MADHURI BAN

AGE: 29Y/ SEX:FEMALE

REF BY: HEALTH PACKAGE

DATE: 25/03/2023

DOPPLER STUDY:

TYPE I DIASTOLIC DYSFUNCTION

	PG	MG	AREA	GRADE of regurgitation
MV				
AV	8 mm Hg			
PV/RVOT	6 mm Hg			
TV				

PASP by TR jet: 20 mm Hg

NO PAH

IMPRESSION:

NORMAL CHAMBER DIMENSIONS

STRUCTURALLY NORMAL CARDIAC VALVES

NO RWMA

NO PAH

TYPE I DIASTOLIC DYSFUNCTION

NORMAL LV SYSTOLIC FUNCTION

CONSULTANT & INTERVENTIONAL CARDIOLOGIST

IMPORTANT INSTRUCTIONS

- Test results released pertain to specimen submitted.
- All test results are dependent on the quality of sample received by the Laboratory.
- Laboratory investigation are only a tool to facilitate in arriving at diagnostic and should be clinically correlated by the Referring Physician.
- Sample repeats are accepted on request of Referring Physician within 7 days post reporting.
- Report delivery may be delayed due to unforeseen circumstances. Inconvenience is regretted.
- Certain test may require further testing at additional cost for derivation of exact value. Kindly submit request within 72 hours post reporting.
- Test results may show interlaboratory variations.
- Test results are not valid for medico legal purposes.
