Thyroid function tests (TFTs) is a collective term for blood tests used to check the function of the thyroid.TFTs may be e requested if a patient is thought to suffer from hyperthyroidism (overactive thyroid) or hypothyroidism (underactive t hyroid), or to monitor the effectiveness of either thyroid-

suppression or hormone replacement therapy. It is also requested routinely in conditions linked to thyroid disease, su ch as atrial fibrillation and anxiety disorder. A TFT panel typically includes thyroid hormones such as thyroidstimulating hormone (TSH, thyrotropin) and thyroxine (T4), and triiodothyronine (T3) depending on local laboratory p olicy.
